WARNING

RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK).
NO USER-SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED
SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

COMPLIANCE NOTICE OF FCC:

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

WARNING: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE-CAUSING EQUIPMENT REGULATIONS.

The information in this manual is believed to be accurate as of the date of publication. We are not responsible for any problems resulting from the use thereof. The information contained herein is subject to change without notice. Revisions or new editions to this publication may be issued to incorporate such changes.

The software included in this product contains some Open Sources. You may obtain the complete corresponding source code from us. See the Open Source Guide on the software CD (*OpenSourceGuide\OpenSourceGuide.pdf*) or as a printed document included along with the User's Manual.

Important Safeguards

<p>1. Read Instructions All the safety and operating instructions should be read before the appliance is operated.</p> <p>2. Retain Instructions The safety and operating instructions should be retained for future reference.</p> <p>3. Cleaning Unplug this equipment from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.</p> <p>4. Attachments Never add any attachments and/or equipment without the approval of the manufacturer as such additions may result in the risk of fire, electric shock or other personal injury.</p> <p>5. Water and/or Moisture Do not use this equipment near water or in contact with water.</p> <p>6. Placement and Accessories Do not place this equipment on an unstable cart, stand or table. The equipment may fall, causing serious injury to a child or adult, and serious damage to the equipment.</p> <div style="text-align: center;">  </div> <p>This equipment and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the equipment and cart combination to overturn.</p> <p>Do not place this equipment on a closed space. Sufficient amount of ventilation air is necessary to avoid increase of ambient temperature which can cause improper operation or the risk of fire.</p> <p>7. Power Sources This equipment should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power, please consult your equipment dealer or local power company.</p> <p>8. Power Cords Operator or installer must remove power and TNV connections before handling the equipment.</p> <p>9. Lightning For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the equipment due to lightning and power-line surges.</p>	<p>10. Overloading Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.</p> <p>11. Objects and Liquids Never push objects of any kind through openings of this equipment as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the equipment.</p> <p>12. Servicing Do not attempt to service this equipment yourself. Refer all servicing to qualified service personnel.</p> <p>13. Damage requiring Service Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:</p> <ul style="list-style-type: none"> A. When the power-supply cord or the plug has been damaged. B. If liquid is spilled, or objects have fallen into the equipment. C. If the equipment has been exposed to rain or water. D. If the equipment does not operate normally by following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation. E. If the equipment has been dropped, or the cabinet damaged. F. When the equipment exhibits a distinct change in performance — this indicates a need for service. <p>14. Replacement Parts When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.</p> <p>15. Safety Check Upon completion of any service or repairs to this equipment, ask the service technician to perform safety checks to determine that the equipment is in proper operating condition.</p> <p>16. Field Installation This installation should be made by a qualified service person and should conform to all local codes.</p> <p>17. Correct Batteries Warning: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.</p> <p>18. Tmra A manufacturer's maximum recommended ambient temperature (Tmra) for the equipment must be specified so that the customer and installer may determine a suitable maximum operating environment for the equipment.</p>

WEEE (Waste Electrical & Electronic Equipment)

Correct Disposal of This Product

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

Chapter 1 — Introduction

Feature

Your color digital video recorder (DVR) provides recording capabilities for 16 camera inputs. It provides exceptional picture quality in both live and playback modes, and offers the following features:

- 12 RJ-12 and 4 BNC Input Connectors
- Compatible with Color (NTSC or PAL) and B&W (CCIR and EIA-170) Video Sources
- H.264 Codec
- Monitor Connectors: 1 HDMI, 1 VGA
- Multiple Search Engines (Date/Time, Record Table, Event)
- Real-time Recording (480/400 Images per Second (NTSC/PAL) with Very High (D1) Resolution)
- Continuous Recording in Disk Overwrite Mode
- 2 USB 2.0 Ports
- Continues Recording while Transmitting to Remote Site and during Playback
- User-friendly Graphical User Interface (GUI) Menu System
- Multiple Recording Modes (Time-lapse, Pre-event, Alarm, Motion and Panic)
- Two-way Audio Communication
- 12-Channel Audio Recording and 1-Channel Audio Playback
- Text Input for ATM and POS
- Alarm Connections Include: Input, Output
- Built-in Alarm Buzzer
- Live or Recorded Video Access via Ethernet
- Time Synchronization using industry standard protocol
- IR Remote Control
- Self-diagnostics with automatic notification including hard disk drive S.M.A.R.T. protocol

Figure 1: Typical DVR installation.

Chapter 2 — Installation

Package Contents

The package contains the following:

- Digital Video Recorder
- Power Adaptors and Power Cords (DVR, Camera)
- LAN Cable
- USB Mouse
- Infrared Remote Control
- Set Up Guide
- REVO Remote Pro Software CD (User's Manual included)

Required Installation Tools

No special tools are required to install the DVR. Refer to the installation manuals for the other items that make up part of your system.

Figure 2: DVR rear panel.

- | | | | |
|----------------------------|----------------|-------------------------------|------------------------|
| ① Video Input | ② Audio Out | ③ Alarm Input/Output | ④ Factory Reset Switch |
| ⑤ Video Out | ⑥ Network Port | ⑦ RS485 Port | |
| ⑧ DVR Power Cord Connector | | ⑨ Camera Power Cord Connector | |

Video Input

Connect the RJ-12 cables from the observation cameras to the modular RJ-12 VIDEO IN connectors.

Connect the coaxial cables from the video sources to the BNC VIDEO IN connectors.

Audio Out

Connect Audio Out to your amplifier using the RCA jack. If supported, connect the audio sources to the audio input connector of the observation cameras that are connected to the modular RJ-12 connectors of the DVR. Refer to the observation camera manual for configuring the Audio In connection. Your DVR can record audio from up to 12 sources.

NOTE: It is the user's responsibility to determine if local laws and regulations permit recording audio.

Alarm Input/Output

NOTE: To make connections on the Alarm Connector Strip, press and hold the button and insert the wire in the hole below the button. After releasing the button, tug gently on the wire to make certain it is connected. To disconnect a wire, press and hold the button above the wire and pull out the wire.

AI 1 to 16 (Alarm-In): You can use external devices to signal the DVR to react to events. Mechanical or electrical switches can be wired to the AI (Alarm-In) and GND (Ground) connectors. The threshold voltage of electrical switches for NC (Normally Closed) is above 2.4V and for NO (Normally Open) is below 0.3V, and should be stable at least 0.5 seconds to be detected. The voltage range of alarm input is from 0V to 5V. See *Chapter 3 – Configuration* for configuring alarm input.

GND (Ground): Connect the ground side of the Alarm input and/or alarm output to the GND connector.

NOTE: All the connectors marked GND are common.

NO (Normally Open): Connect the device to the COM and NO (Normally Open) connector. NO is a relay output which sinks 1A@30VDC. See *Chapter 3 – Configuration* for configuring alarm output.

Connector Pin Outs:	AI (1 to 16)	Alarm Inputs 1 to 16
	GND	Chassis Ground
	COM	Relay Common
	NO	Relay Alarm Out (Normally Open)

Factory Reset Switch

The DVR has a Factory Reset switch to the left of the HDMI connector on the rear panel. This switch will only be used on the rare occasions that you want to return all the settings to the original factory settings.

CAUTION: When using the *Factory Reset*, you will lose any settings you have saved.

To reset the unit, you will need a straightened paperclip:

1. Turn the DVR off.
2. Turn it on again.
3. While the DVR is initializing, the front panel LEDs will blink. When the front panel LEDs blink, poke the straightened paperclip into the unlabeled hole to the left of the HDMI connector.
4. Hold the reset switch until the DVR's internal buzzer sounds twice.
5. Release the reset switch. All of the DVR's settings are now at the original settings it had when it left the factory.

Video Out

An HDMI (High-Definition Multimedia Interface) connector is provided so that you can use an HDMI monitor as your main monitor.

A VGA connector is provided so that you can use a standard, multi-sync computer monitor as your main monitor. Use the cable supplied with your monitor to connect it to the DVR.

NOTE: Connect the monitor before the DVR boots so that video can be displayed on the monitor with the resolution you have set during system setup. If you want to use both the HDMI and VGA Monitor connectors, one of the monitors should be connected before the DVR boots, and the other monitor should be connected after the DVR boots.

Network Port

The DVR can be networked using the 10Mb/100Mb/1Gb Ethernet connector. Connect a Cat5 cable with an RJ-45 jack to the DVR connector. The DVR can be networked with a computer for remote monitoring, searching, configuration and software upgrades. See *Chapter 3 – Configuration* for configuring the Ethernet connections.

CAUTION: The network connector is not designed to be connected directly with cable or wire intended for outdoor use.

RS485 Port

The DVR can be controlled remotely by an external device or control system, such as a suitable control keyboard, using RS485 half-duplex serial communications signals. The RS485 connector can also be used to control PTZ (pan, tilt, zoom) cameras. Connect RX+/TX+ and RX-/TX- of the control system to the + and - (respectively) of the DVR. See *Chapter 3 – Configuration* and the PTZ camera or remote controller manufacturer's manual for configuring the RS485 connection.

Connector Pin Outs:

Master Unit		Slave Unit	
+	→ To	→	TX+/RX+
-	→ To	→	TX-/RX-

Power Cord Connector

Connect the connector of the adaptor to the DVR, and connect the AC power cord to the adaptor and then to the wall outlet.

The CAMERA power connector is provided to supply power to the observation cameras. Connect the connector of the adaptor to the DVR, and connect the AC power cord to the adaptor and then to the wall outlet.

WARNING: ROUTE POWER CORDS SO THAT THEY ARE NOT A TRIPPING HAZARD. MAKE CERTAIN THE POWER CORD WILL NOT BE PINCHED OR ABRADED BY FURNITURE. DO NOT INSTALL POWER CORDS UNDER RUGS OR CARPET. THE POWER CORD HAS A GROUNDING PIN. IF YOUR POWER OUTLET DOES NOT HAVE A GROUNDING PIN RECEPTACLE, DO NOT MODIFY THE PLUG. DO NOT OVERLOAD THE CIRCUIT BY PLUGGING TOO MANY DEVICES IN TO ONE CIRCUIT.

Your DVR is now ready to operate. Refer to *Chapter 3 – Configuration* and *Chapter 4 – Operation*.

Chapter 3 — Configuration

NOTE: Your DVR should be completely installed before proceeding. Refer to *Chapter 2 — Installation*.

Front Panel Controls

Figure 3: DVR front panel.

- ① HDD LED ② Power LED ③ Alarm LED ④ USB Port

NOTE: The infrared sensor on the DVR is just to the top of the Power LED. Make certain that nothing blocks the sensor, or the remote control will not function properly.

When you use wireless communication devices (such as Wi-Fi or Bluetooth) near the DVR, the remote control might not function properly.

You can also use a USB mouse to navigate through the screens and menus much like you would on a computer.

HDD LED

The HDD LED flickers when the DVR is recording or searching video on the hard disk drive.

Power LED

The power LED is lit when the unit is On.

Alarm LED

The Alarm LED is lit when alarm output or internal buzzer is activated.

USB Port

Connect the supplied USB mouse to one of the ports. The USB mouse will be used to access many of the DVR's functions. A USB flash drive can be connected for backup or system upgrades.

Remote Control Buttons

Figure 4: Infrared remote control.

ID Button

If a DVR System ID is set to 0, the infrared remote control will control that DVR without any additional operations. (Refer to the *System – General* setup screen in this chapter for further information on setting the System ID.) If the system ID is 1 to 16, you must to press the **ID** button and then press the number button (1 to 16 (+10 & 6)) in order to control that DVR. If the System ID of two or more DVRs is set to 0, those DVRs will react to the infrared remote control at the same time.

Camera Buttons

Pressing the individual camera buttons will cause the selected camera to display full screen. Buttons 1 to 9 are also used to enter passwords.

Sequence Button

When in the Live Monitoring mode, pressing the **SEQUENCE** button displays live channels sequentially.

Freeze Button

Pressing the **FREEZE** button freezes the current live screen.

Arrow Buttons

These buttons are used to navigate through menus and GUI. You can also use them to change numbers by highlighting a number in the menu and using the **Up** and **Down** arrow buttons to increase or decrease the number's value. These buttons are also used to control Pan and Tilt when in the PTZ mode.

When in the PIP display format, pressing the **Up** and **Down** arrow buttons moves the position of the small screen counter-clockwise and clockwise.

Pressing the **Left** and **Right** buttons moves through screen pages in the Live Monitoring mode and Search mode.

Menu Button

In the Live Monitoring mode and Search mode, pressing the **MENU** button displays the menu icons on the right edge of the screen. Pressing the button also hides the menu icons. During menu setup, pressing the button closes the current menu or setup dialog box.

Playback Buttons

- **Rewind:** Pressing the  button plays video backward at high speed. Pressing the button again toggles the playback speed from ,  and .
- **Play/Pause:** Pressing the  button plays back video at regular speed and pressing the button again pauses video. The screen displays  when the DVR is in the Pause mode and the screen displays  when the DVR is playing back video.
- **Fast Forward:** Pressing the  button plays video forward at high speed. Pressing the button again toggles the playback speed from ,  and .
- **Stop:** Pressing the  button stops playback and enters the Live Monitoring mode.
- **Backward:** When in the pause mode, pressing the  button moves to the previous image.
- **Forward:** When in the pause mode, pressing the  button moves to the next image.

In the Live Monitoring mode, pressing any playback button enters to the Search mode.

Panic Button

Pressing the **PANIC** button starts panic recoding of all camera channels, and displays  on the screen. Pressing the button again will stop panic recording.

Layout Button

Pressing the **LAYOUT** button toggles between different display formats. The available formats are: 4x4, 3x3, 1+7, 1+5, 2x2 and PIP.

Zoom Button

Pressing the **ZOOM** button zooms the current image on the screen. A PIP with a rectangle temporarily displays showing what area of the screen has been enlarged. You can use the arrow buttons to move the rectangle to another area.

PTZ Button

Pressing the **PTZ** button enters the PTZ (Pan/Tilt/Zoom) mode which allows you to control properly configured cameras.

Enter Button

The  (Enter) button selects a highlighted item or completes an entry that you have made during system setup. This button is also used to enter the Cameo mode in the Live Monitoring mode or Search mode.

Alarm Button

Pressing the  button resets the DVR's outputs including the internal buzzer during an alarm.

PTZ Control Buttons

While in the PTZ mode, the  buttons are used to save Presets and load a Preset View, the  buttons are used to Zoom In and Zoom Out, and the  buttons are used for Near Focus and Far Focus.

Back Up Button

Pressing the  button allows you to copy video clips.

Calendar Button

In the search mode, pressing the  button displays the Calendar Search screen.

Turning on the Power

Connecting the power cord to the DVR turns on the unit. The unit takes approximately 50 seconds to initialize.

Initial Unit Setup

Before using your DVR for the first time, you will want to establish the initial settings. This includes items such as time and date, display language, camera, remote control, record mode, network and password. Your DVR can be set up using various screens and dialog boxes.

NOTE: The following describes how to use the remote control and mouse in the setup screen.

	Remote Control	Mouse
To enter the setup screen...	In Live Monitoring mode, press the  button to display the menu icons on the right edge of the screen. Select the  (Setup) icon by pressing the  button.	In the Live Monitoring mode, move the mouse pointer to the right edge of the screen to display hidden menu icons. Click the  (Setup) icon with the left button.
To select items...	Move to the desired item by pressing the arrow buttons (   ) and select it by pressing the  button.	Click the desired item with the left button.
To change values...	Select the desired item and press the Up and Down arrow buttons ( ) to increase or decrease the values and then press the  button to complete the entry.	Select the desired item with the left button and roll the mouse wheel up and down to increase or decrease the values.
To enter characters...	Select the desired item and press the  button to display a virtual keyboard. Move to the desired character by pressing the arrow buttons, and press the  button.	Select the desired item with the left button to display a virtual keyboard. Click the desired character with the left button.

NOTE: For simplicity, most of the operation explanations in this manual are based on using the Remote Control.

Throughout the screens you will see . Highlighting the  and pressing the  button on the remote control gives you the opportunity to reset that screen to its default settings.

Highlighting This page or All pages and pressing the  button resets the current page or all pages of the screen to its or their default settings.

After you are finished with any setup screen, you can highlight Save and press the  button to save the changes and exit the screen. If you do not wish to save the changes, highlight Cancel and press the  button to exit the screen.

Press the **MENU** button or move the mouse pointer on the right edge of the screen and then select  (Login) in the Live Monitoring menu to enter the setup screens. The Login screen appears.

Select a User and enter the password by pressing the appropriate combination of Camera number buttons and then the  button. The factory default password is 1234 for a User and there is no password for an admin user. If you do not know the password, click the  button for guidance.

Figure 5: Login screen.

NOTE: When logged on as the User, live monitoring, searching video and exporting recorded data (Backup) can only be allowed.

To assure the secure management of the system, setting up a password is strongly recommended.

If you cannot use the remote control buttons, click the  button using the mouse to enter a password, and the virtual keyboard displays. See instructions below for using the virtual keyboard.

To log the user out of the system, press the **MENU** button or move the mouse pointer on the right edge of the screen and then select  (Logout) in the Live Monitoring menu. The Logout screen displays asking you to confirm whether or not you want to log out the current user.

Figure 6: Logout screen.

Setup Screen

- ① System
- ② Record
- ③ Event
- ④ Camera
- ⑤ Device
- ⑥ Network
- ⑦ Notification
- ⑧ Display

Figure 7: Setup screen.

Press the **MENU** button or move the mouse pointer on the right edge of the screen and then select **⚙️** (Setup) in the Live Monitoring menu to enter the setup screen.

While setting up the DVR, there will be many opportunities to enter names and titles. When making these entries, a Virtual Keyboard will appear.

Use the arrow keys to highlight the character you want in the name or title and press the **⏏** button. That character appears in the title bar and the cursor moves to the next position. Pressing **↕** toggles between the upper and lower case keyboards, **⬅** backspaces, and **✖** deletes entered characters. Pressing **📏** toggles between different keyboard layouts. You can use up to 31 characters including spaces in your title.

Special characters can be created using **^** and a capital letter; e.g., **^J** for NL (New Line), **^M** for CR (Carriage Return). Special characters are commonly used by text input devices and will be useful when performing Text-In Searches.

System Setup

General

Figure 8: System – General setup screen.

Highlight the **Site** box and press the **⏏** button. A virtual keyboard appears that you can use to enter a Site Name. Once you have entered your title, highlight **OK** and press the **⏏** button.

Highlight the box beside **System ID** and press the **⏏** button. Change the number by highlighting it and using the Up and Down arrow buttons to increase and decrease the number from 0 to 99.

NOTE: The System ID number is used to identify the unit when it is connected with other DVRs through the RS485 port. You cannot use the same ID number for two or more DVRs that are in the same RS485 network. It is possible to have multiple DVRs with System ID 0 that are in the same area as long as they are not part of an RS485 network. If this is the case, all will be controlled at the same time when using the infrared remote control.

Highlight the box beside **Language** and press **⏏** button. A drop-down menu displays the available languages. Highlight the desired language and press the **⏏** button.

The box beside Version displays the software version of the DVR. To upgrade the software, connect a USB device containing the upgrade package file to the DVR. Highlight Upgrade... and press the  button. The Upgrade screen appears. The screen displays the upgrade package file names that are available. The “.rui” indicates that the file is for software upgrades.

Select the desired file and press the  button. Highlighting the Install button and pressing the  button will install the selected software package. Highlighting the Cancel button and pressing the  button will close the window without upgrading the software. If the upgrade package file is not installed on the DVR properly, you will get an error message. The system restarts automatically after completing the upgrade.

CAUTION: The USB device must be FAT16 or FAT32 format.

You can import saved DVR settings or export the current DVR settings. To import saved DVR settings, connect the USB device containing the setup file (.dat) to the DVR. Highlight Setup – Import... and press the  button. Select the desired setup file and press the Import button to import the selected settings and change the DVR settings accordingly.

To export the current DVR settings, connect the USB device to the DVR. Highlight Setup – Export... and press the  button. Highlight the box beside File name and press the  button. A virtual keyboard allows you to enter the file name. Selecting Export will save the current settings in .dat file format on the USB device.

NOTE: Even after changing the DVR settings by importing saved settings, the time-related settings (Date/Time, Time Zone and Daylight Saving Time) will NOT be changed.

CAUTION: The USB device must be FAT16 or FAT32 format.

Highlight Show System Log... and press the  button to display the System Log.

The System Log screen lists system activities (up to 5,000 from the latest) that have occurred along with the time and date. The  icon will be displayed in the last column for system activities of the remote site. You can scroll through the log pages by using the Up and Down arrows, or you can go directly to a log page by entering the log page number in the box at the bottom left of the screen. Highlight **Close** and press the  button to exit the screen.

To export the system log information, connect the USB device to the DVR. Highlight **Export...** and press the  button. Highlight the box beside **File name** and press the  button. A virtual keyboard allows you to enter the file name. Selecting **Export** will save the log information in .txt file format on the USB device.

NOTE: When opening the saved .txt file, setting to the proper character encoding and using fixed width fonts will be required to read the file properly.

The box beside **Recorded Data – From / To** displays the time information of recorded data.

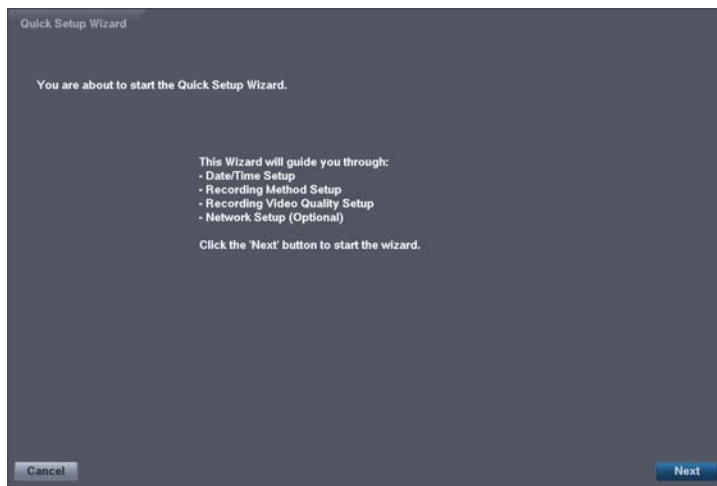

Highlighting **Clear All Data...** and pressing the  button will clear all video data. You will be asked to verify that you wish to clear all data before the DVR erases the video data. **Clear All Data...** will not clear the System Log.

Highlight **Wizard** and press the  button. The Wizard setup screen appears. The Wizard setup guides you through configuring the system for basic operation.

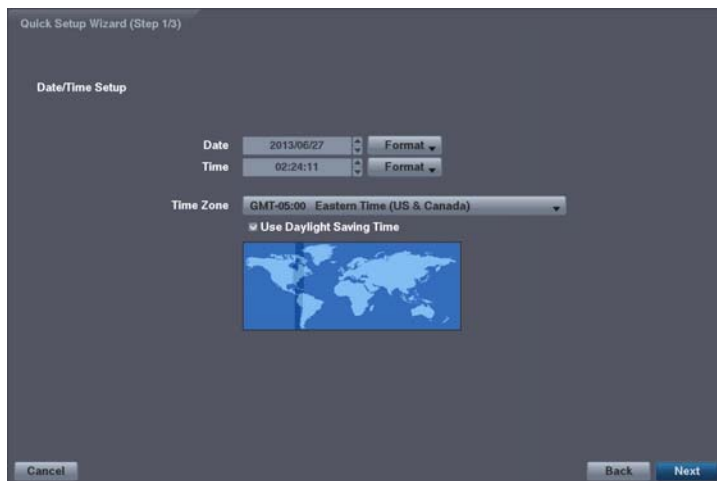

Select either **Quick wizard** or **Network wizard** and select the **Next** button to start the selected setup wizard.

NOTE: Selecting the **Cancel** button throughout the screens exits the **Quick Setup Wizard** without saving your changes and returns to the main setup screen.

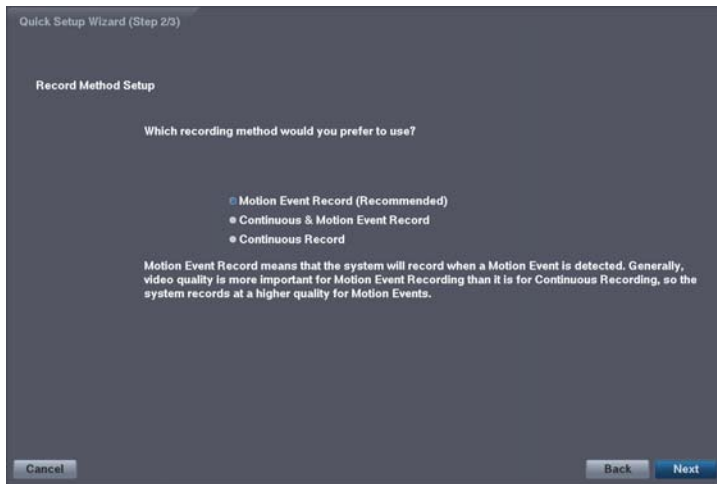

If you selected the Quick wizard, selecting the Next button starts the Quick Setup Wizard.

Date/Time Setup

- **Date:** Set the system date and select the date format.
- **Time:** Set the system time and select the time format.
- **Time Zone:** Select your time zone. The Time Zone can be selected on the map.
- **Use Daylight Saving Time:** Selecting the box sets the system to use daylight saving time.

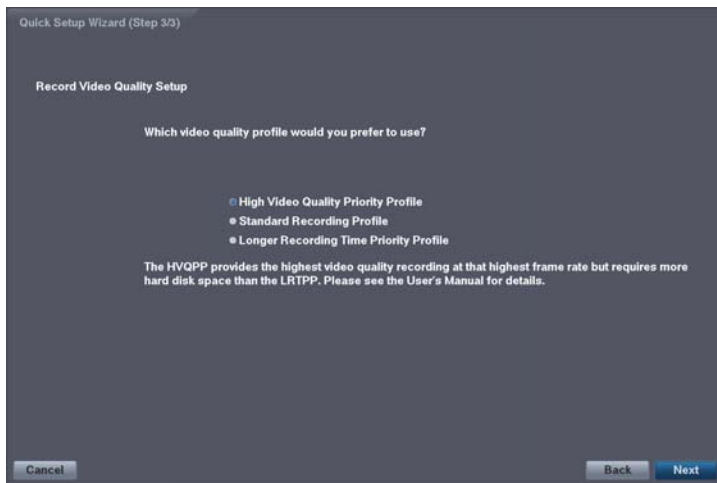

NOTE: The Date/Time will be set, and the clock will start when you click the **Next** button.

Record Method Setup

- Select the desired recording mode from:
 - Motion Event Record (Recommended)
 - Continuous & Motion Event Record
 - Continuous Record

NOTE: You should understand each recording mode before setting the DVR's recording method.

Record Video Quality Setup

- Select the desired video quality profile from:
 - Higher Video Quality Priority Profile
 - Standard Recording Profile
 - Longer Recording Time Priority Profile

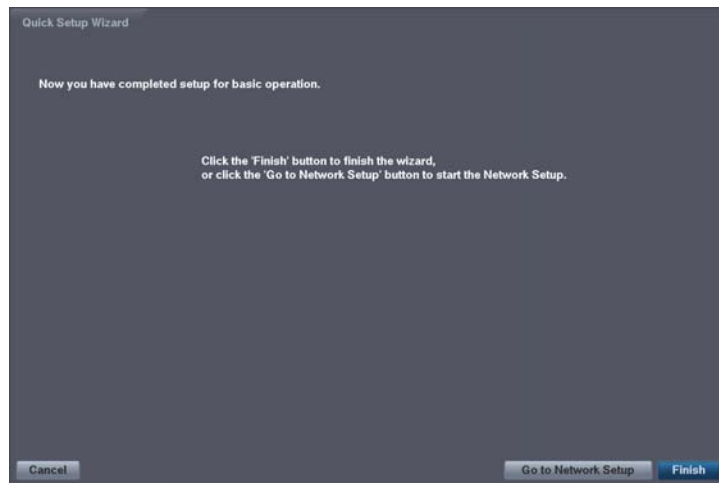

NOTE: The higher quality setting requires more storage space.

The recording resolution will be set to Very High when selecting *High Video Quality Priority Profile*, High when selecting *Standard Recording Profile*, and Standard when selecting *Longer Recording Time Priority Profile*.

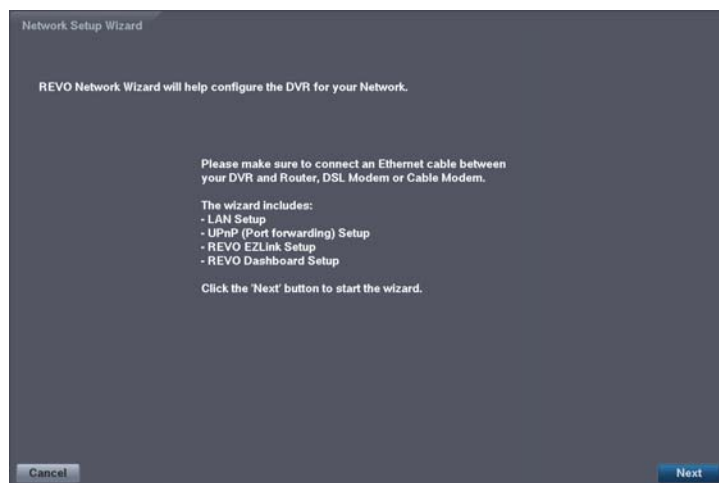

The recording quality and recording speed of each camera channel will be set as show below according to the *Record Method* and *Record Video Quality* you set.

	HVQPP*	SRP*	LRTPP*
Motion Event Record	Very High / 30 ips	High / 5 ips	Standard / 3 ips
Continuous & Motion Event Record	Very High / 30 ips (Time) Very High / 30 ips (Event)	High / 5 ips (Time) Very High / 30 ips (Event)	Standard / 3 ips (Time) High / 5 ips (Event)
Continuous Record	Very High / 30 ips	High / 5 ips	Standard / 3 ips

* Record Video Quality: HVQPP (High Video Quality Priority Profile), SRP (Standard Recording Profile), LRTPP (Longer Recording Time Priority Profile)

Select the Finish button to finish the Quick Setup Wizard and select the Go to Network Setup button to start the Network Setup.

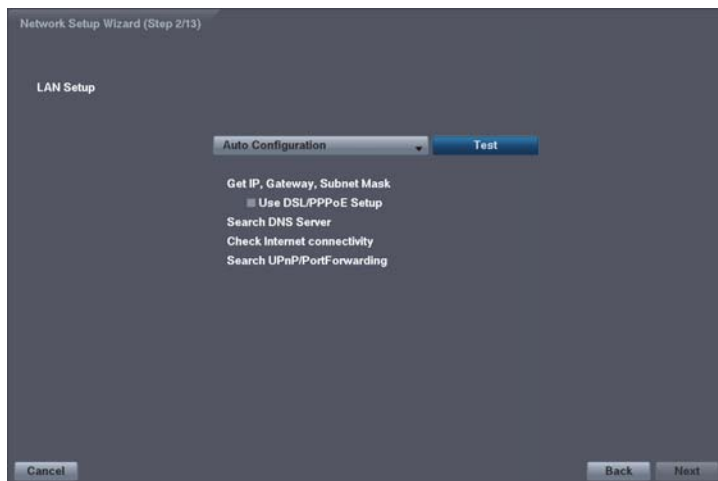

If you selected the Go to Network Setup, select the Next button to start the Network Setup Wizard.

Internet Connection

Select whether or not your DVR is connected to the Internet.

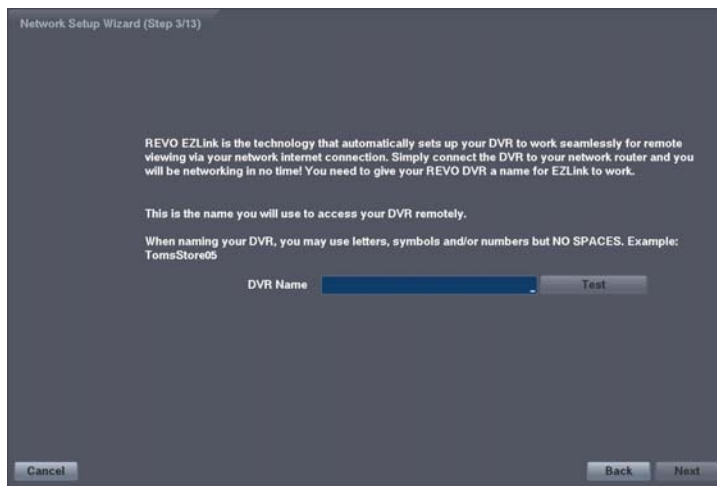

LAN Setup

Select between Auto Configuration and Manual Configuration for network configuration, and then select the Test button to test the network configuration you selected.

NOTE: Selecting *Auto Configuration* allows the DVR to automatically obtain LAN parameters (IP address, Gateway, Subnet Mask and DNS Server address). Selecting *Manual Configuration* allows you to set up LAN parameters manually.

The network configuration you set should be tested by selecting *Test*, otherwise the *Next* button will cannot be selected, and you cannot move to the next step.

- Use DSL/PPPoE Setup: Selecting the box allows you to set up the DSL network. Entering the ID and password for DSL connection is required.

EZLink Setup

- DVR Name: Enter the DVR name to be registered on the DVRNS (DVR Name Service) server.

NOTE: The DVR Name you entered should be checked by selecting *Test*, otherwise the EZ Link changes will not be saved.

When entering no name or a name already registered on the DVNRS server, an error message displays.

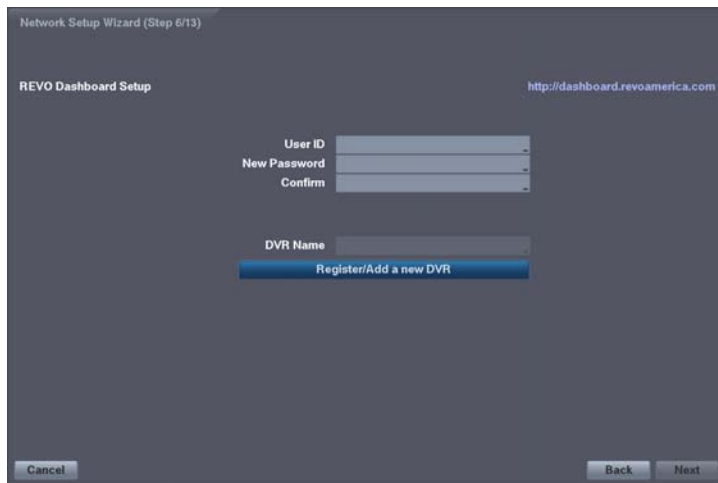

REVO Dashboard Setup I

Select the **Next** button to start the Dashboard Setup.

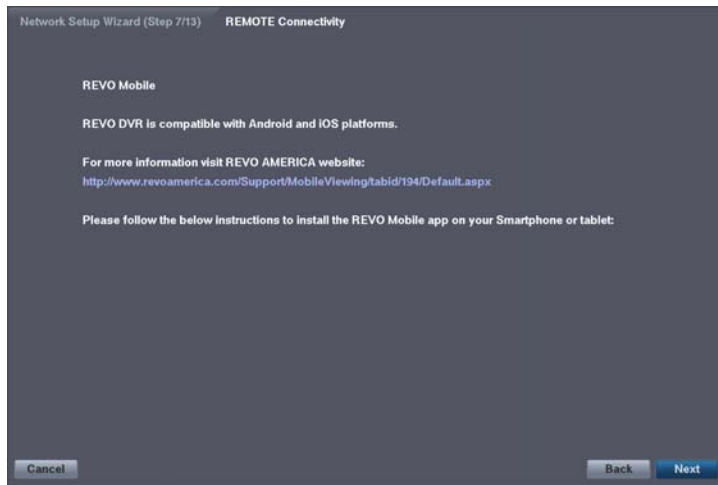

REVO Dashboard Setup II

Select **New account** if you want to create a new Dashboard account, and select **Existing account** if you want to use your existing Dashboard account.

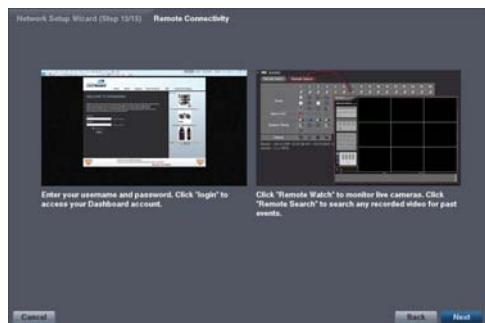

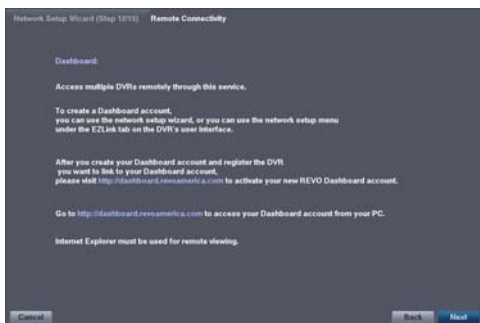

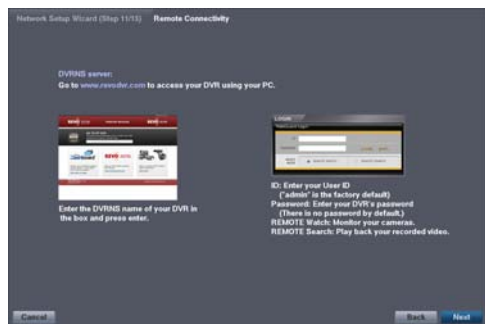

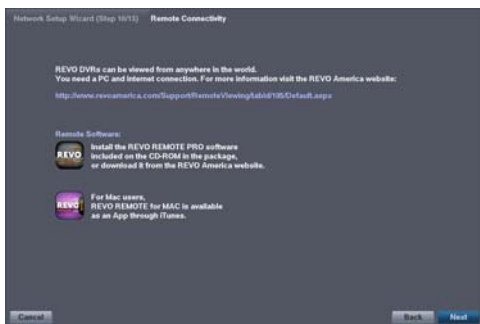

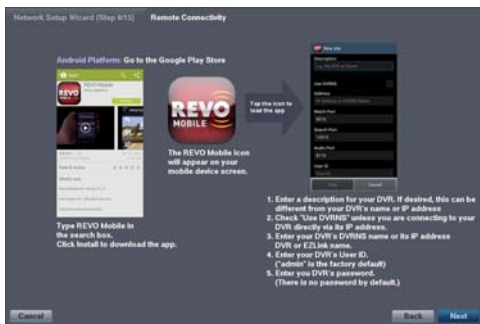

REVO Dashboard Setup III

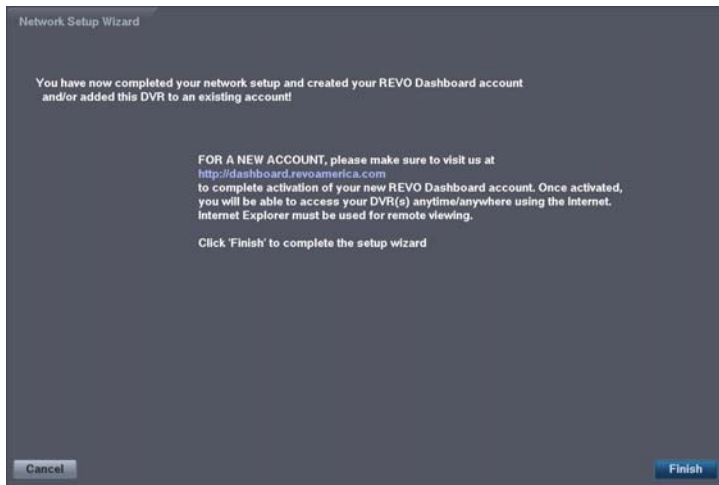

Enter the User ID and Password for your Dashboard account. And then register the DVR you want to access by entering the DVR name and selecting the **Register/Add a new DVR** button.

REVO Mobile

Select the Next button to see the instructions to install the REVO Mobile app on your Smartphone or tablet.

Select the Finish button to finish the Setup Wizard.

Highlight System Shutdown and press the  button. The Shutdown screen displays asking you to confirm whether or not you want to shut the system down.

After selecting Shutdown and pressing the  button, a screen will appear telling you when it is safe to disconnect power.

Date/Time

Figure 9: System – Date/Time setup screen.

Highlight the first box beside **Date** and press the  button. The individual sections of the date will highlight. Use the Up and Down arrow buttons to change the number. Use the Left and Right arrow buttons to move between month, date and year. Once you have the correct date, press the  button.

Highlight the Format box beside **Date** and press the  button. Select from the three available date formats and press the  button to save your selected format.

Highlight the first box beside Time and press the  button. The individual sections of the time will highlight. Use the Up and Down arrow buttons to change the number. Use the Left and Right arrow buttons to move between hour, minutes and seconds. Once you have the correct time, press the  button.

Highlight the Format box beside Time and press the  button. Select from the three available time formats and press the  button to save your selected format.

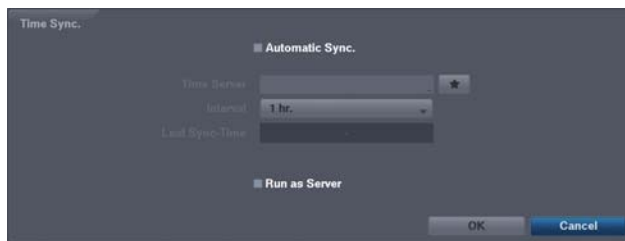

NOTE: The clock will not start running until you have highlighted Save and pressed the  button.

Highlight the box beside Time Zone and press the  button. Select your time zone from the list and press the  button.

NOTE: The Time Zone can also be selected on the map below by pressing the Left and Right buttons or scrolling the mouse wheel up and down.

Highlight Use Daylight Saving Time and press the  button. Pressing the  button toggles between On and Off.

Highlighting Time Sync... and pressing the  button displays the Time Sync. screen. You can set up time synchronization between the DVR and standard time servers that are available in most time zones and countries, or between the DVR and another DVR.

Highlight the box beside Automatic Sync. and press the  button. This toggles between On and Off.

Highlight the box beside Time Server and press the  button. A virtual keyboard appears that you can use to enter the IP address or domain name of the time server. Highlighting  allows you to select your time server from a list of registered time servers.

NOTE: You can use the domain name instead of IP address if you already set up the DNS Server when setting up the LAN.

Highlight the box beside Interval and press the  button. Set the time interval for synchronization from 30 minutes to 1 day at various time intervals.

Last Sync-Time displays the last time the DVR was synchronized with the time server.

Highlight Run as Server and press the  button. Pressing the  button toggles between On and Off. When it is On, the DVR you are setting up will run as a time server.

Highlighting Holiday... and pressing the  button displays the Holiday screen.

You can set up holidays by highlighting + and pressing the  button. The current date appears.

Highlight the month and day and change them by using the Up and Down arrow buttons. Press the  button to add the date. Dates can be deleted by highlighting the **X** beside the date and pressing the  button.

NOTE: Holidays that do not fall on the same date each year should be updated once the current year's holiday has passed.

User

Figure 10: System – User setup screen.

The +/- column is used to collapse and expand user groups. If there is a + or – in this column, it indicates the item is a Group Name. If there is a – in front of the Group Name, it indicates that the group has been “expanded” and all of the User Names within that group are displayed below the Group Name. If there is a + in front of the Group Name, it indicates that the group has been “collapsed” and all of the User Names within that group are hidden. To collapse or expand a group, highlight the +/- column in front of the desired group and press the  button.

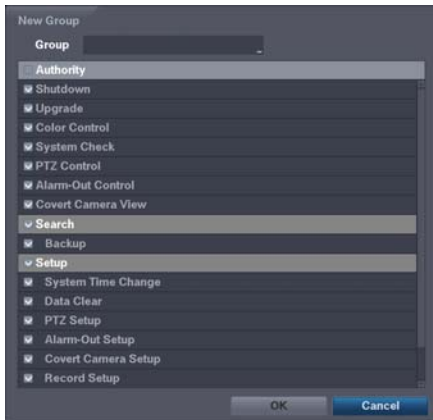

Highlighting a Group Name and pressing the  button allows you to change the authority levels assigned to the group.

CAUTION: Write down the new password and save it in a secure place. If the password is forgotten, the unit must be reset using the *Factory Reset Button* and all data settings will be lost.

Highlighting a User Name and pressing the  button allows you to add or change the password assigned to that user. You can also change the group to which the user is assigned.

The **X** column can be used to delete a User Name or an entire Group. If the **X** is grayed out, that Group or User cannot be deleted. Highlight the **X** and press the  button. You will be asked to confirm that you want to delete the User or Group. To delete the User currently logged into the DVR on a local system or a PC running REVO Remote Pro, log the user out of the system first and then delete the user.

To add a Group, highlight the **+ Group...** box and press the  button. A virtual keyboard appears allowing you to enter the Group name. You can use up to 15 characters including spaces in the group name. Enter the name and assign authority levels to the group.

Highlighting the Authority box and pressing the  button will toggle between all authority levels being turned On and Off.

Highlighting the individual authority level boxes and pressing the  button will toggle between that authority level being turned On and Off. The authority levels that can be turned On and Off are:

- **Shutdown** – The user can shut the system down on a local system.
- **Upgrade** – The user can upgrade the software on a local system or a PC running REVO Remote Pro.
- **Color Control** – The user can control brightness, contrast, hue and saturation for cameras on a local system or a PC running REVO Remote Pro.
- **System Check** – The user can view the remote system status or check the remote system status as a batch process on a PC running REVO Remote Pro.
- **PTZ Control** – The user can control the PTZ camera on a local system or a PC running REVO Remote Pro.
- **Alarm-Out Control** – The user can reset the DVR's outputs including the internal buzzer during an alarm by pressing the **ALARM** button on the remote control on a local system or alarm-out control button on a PC running REVO Remote Pro.
- **Covert Camera View** – The user can view video from cameras set as Covert while in the Live Monitoring or Search mode on a local system or a PC running REVO Remote Pro.
- **Search** – The user can access the Search mode on a local system or a PC running REVO Remote Pro.
- **Backup** – The user can copy video clips on a local system or a PC running REVO Remote Pro.
- **Setup** – The user without Setup authority cannot establish any system settings excluding system shutdown and logout on a local system or a PC running REVO Remote Pro.
- **System Time Change** – The user can change the system date and time on a local system or a PC running REVO Remote Pro.
- **Data Clear** – The user can clear all video data or format disks on a local system or a PC running REVO Remote Pro.
- **PTZ Setup** – The user can establish all PTZ settings on a local system or a PC running REVO Remote Pro.
- **Alarm-Out Setup** – The user can establish all Alarm-Out settings on a local system or a PC running REVO Remote Pro.
- **Covert Camera Setup** – The user can establish all Covert Camera settings on a local system or a PC running REVO Remote Pro.
- **Record Setup** – The user can establish all Record settings on a local system or a PC running REVO Remote Pro.
- **Setup Import** – The user can import saved DVR settings from a local system or a PC running REVO Remote Pro.
- **Setup Export** – The user can export the current DVR settings to a local system or a PC running REVO Remote Pro.

To add a User, highlight the **+ User...** box and press the  button. A virtual keyboard appears allowing you to enter the User Name. Enter the name and assign the User to a Group and password. You can use camera buttons 1 to 9 on the remote control to assign the password. The password can be up to 8 digits. You will be asked to confirm the password.

NOTE: In addition to using the infrared remote control, you can use the virtual keyboard to assign the password. To display the virtual keyboard click the  button using the mouse.

Highlighting the box beside Auto Login allows you to select a User to be automatically logged in when the DVR is powered up. It can also be set to never automatically login a user.

Highlighting the box beside Auto Logout allows you to select from a list of times that the user will be automatically logged out. The options are: Never, 1 min., 3 min., 5 min., 10 min., 15 min., 20 min., 30 min. and 1 hr.

Storage

Figure 11: System – Storage setup screen.

The information in the Type column describes the storage device.

The capacity of the storage device is displayed in the Capacity column.

The Format column displays whether the device is used for recording (Record) or not (Not Using). Not formatted indicates the device is not formatted.

Highlight the box in the Format column for the desired storage device and press the button. You will be able to format the device for recording. When selecting Not Using from Use As and highlighting the Format button, the device will not be used for recording.

The Information column displays whether the device is being used or not. Other indicates the device has been used for another DVR.

Highlight the box in the Information column for the desired storage device and press the button.

You will be able to check the model name, serial number and the time information about recorded data of the selected storage device.

If you want to erase recorded data on the selected device, highlight Clear and press the button. You will be asked whether or not you want to delete the data.

System Event

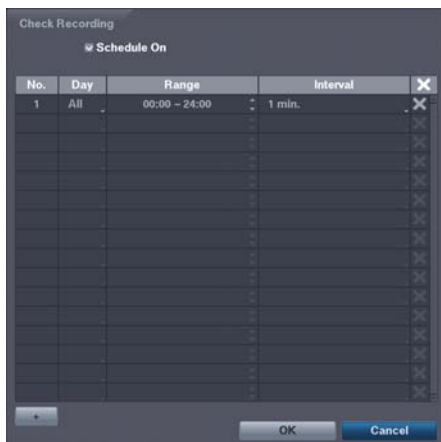

Figure 12: System – System Event setup screen.

The DVR can be configured to run self-diagnostics and report the results.

Highlight the **Settings** box beside the desired event (System, Check Recording, Check Alarm-In, Disk Almost Full, Disk Bad, or Disk Temperature), and press the button.

Highlight the **Settings** box beside **System** and press the button. You can select the interval that you want the DVR to run self-diagnostics on the system. You can select from 1 hr. to 30 days or **Never**.

Highlight the **Settings** box beside **Check Recording** and press the button. The Check Recording screen appears.

Highlighting **Schedule On** and pressing the button toggles On and Off. When set to On, you can select the day, time range and interval that you want the DVR to run self-diagnostics on the recorder. The **Interval** can be selectable from 1 min. to 7 days or **Never**. Highlight the **+** and press the button to add a schedule item. The **x** box allows you to delete a check recording schedule.

Highlight the **Settings** box beside **Check Alarm-In** and press the button. You can select the interval that you want the DVR to run self-diagnostics on Alarm Inputs. You can select from 1 hr. to 30 days or **Never**.

Highlight the **Settings** box beside **Disk Almost Full**, and press the button. Select the percentage level of disk usage at which you want the DVR to trigger an alert. Percentage levels range from 80% to 99%.

Highlight the **Settings** box beside **Disk Bad**, and press the button. Select percentage level of bad disk sectors at which you want the DVR to trigger an alert. Percentage levels range from 10% to 90%.

Highlight the **Settings** box beside **Disk Temperature**, and press the **[F4]** button. Select the temperature of hard disk drive at which you want the DVR to trigger an alert if the temperature exceeds the defined threshold. Refer to the hard disk drive manufacturer's documentation for the correct temperature setting.

The DVR can be set to react to system events. Highlight the **Actions** box beside the desired event and press the **[F4]** button. System events can be associated with an Alarm-Out connector, sound the DVR's internal buzzer, and/or notify a number of different devices.

NOTE: *Alarm-Out* action cannot be set to *System, Boot Up, Restart, Shutdown* and *Panic Record* events. *Mail* notify is the only option available for the *System* event. *Alert Window* notify cannot be set to *System, Boot Up, Restart* and *Shutdown* events. For the *Notify* action to work, the DVR should be registered in the REVO Remote Pro (Remote Administration System).

Recording Setup

General

Figure 13: Record – General setup screen.

Highlighting **Recycle** and pressing the **[F4]** button toggles between On and Off. In the Recycle mode, the DVR records over the oldest video data once all available storage space has been used. When Recycle is turned off, the DVR stops recording once all available storage space has been used.

Highlight the **Event Record Dwell** box and set the length of time you would like to record for the associated event. You can set the dwell from 5 seconds to 30 minutes. Refer to *Event Actions* screen in this chapter for information regarding event recording.

The DVR can record up to 12 audio inputs. Highlighting **Record Audio** and pressing the **[F4]** button toggles between On and Off.

Highlight the slide bar beside **Auto Deletion**, and use the Left and Right arrow buttons or Up and Down arrow buttons to adjust the length of time recorded data will be kept from 1 to 999 days. The DVR automatically deletes video recorded earlier than the user-defined period under three conditions: at midnight, whenever the system reboots or whenever the user changes the Auto Deletion settings. Selecting **Never** will disable the Auto Deletion function.

Highlighting **Use Panic Recording** and pressing the **[F4]** button toggles between On and Off.

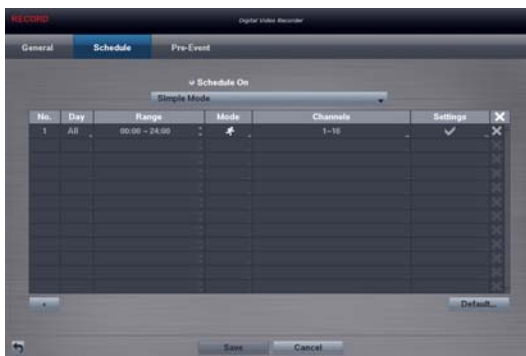

Highlight the Panic Recording – Duration box and set the duration of panic recording. Panic recording will stop automatically after the preset duration as long as the **PANIC** button is not pressed to stop the panic recording. You can set the dwell from 5 minutes to 1 hour. Select No Limit if you want to stop panic recording manually.

Highlighting the Panic Recording – ips and pressing the button allows you to set the images per second for Panic recording. You can select from 1.00 to 30.00 ips (25.00 ips PAL).

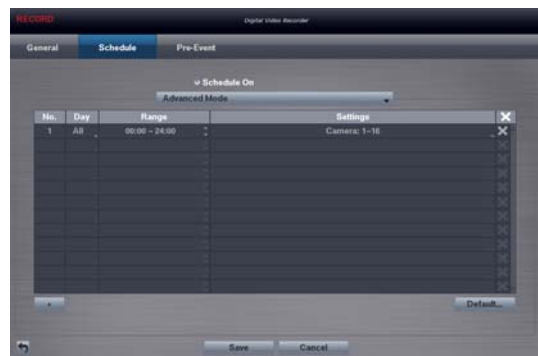

Highlighting the Panic Recording – Quality and pressing the button allows you to set the recorded image quality for Panic recording. You can select from: Very High, High, Standard and Basic.

Highlighting the Panic Recording – Resolution and pressing the button allows you to set the recorded image resolution for Panic recording. You can select from: Very High (D1), High (Half D1) and Standard (CIF).

Schedule

< Simple Mode >

< Advanced Mode >

Figure 14: Record – Schedule setup screen.

You can program the DVR to record only during certain times based on time, day of the week, and holidays. The smallest time segment you can use is 15 minutes.

Highlighting Schedule On and pressing the button toggles between On and Off. In the Schedule On mode, the DVR records video based on the schedule established in the Schedule screen. When turning Schedule recording Off, you will be asked to confirm your decision, and  displays at the top-left corner of each camera screen. Panic recording will function even when Schedule is turned off.  displays during panic recording.

Highlight the Schedule Mode box and press the button. You can select between Simple Mode and Advanced Mode. Selecting Advanced Mode allows you to set up individual recording schedule for each event.

NOTE: Changing the schedule mode will reset all event and action statuses.

Highlight the + and press the button to add a schedule item.

Highlight the box under the Day heading and press the button to change the days that the scheduled recording will take place. Choose from: Sun, Mon, Tue, Wed, Thu, Fri, Sat, M-F, Hol and All.

Highlight the box under the Range heading and press the button to change the time range that the scheduled recording will take place. The smallest time segment you can use is 15 minutes.

Highlight the box under the Mode heading and press the button to change the recording mode that will be used. Choose from: No Record, Time, Event and Time & Event. (Simple Mode Only)

When the DVR is in the No Record mode, it will not record during the preset day and time range as long as the **PANIC** button is not pressed. Use the No Record mode when you do NOT want the DVR to record during certain times.

When the DVR is in the Time mode, the  icon displays at the top-left corner of the screen. The DVR will record and displays the  icon at the top-left corner of the screen during the scheduled times.

When the DVR is in the **Event** mode, the red  icon displays at the top-left corner of the screen. The DVR will record and displays the  icon at the top-left corner of the screen when any event occurs. When the DVR is in the **Pre-Event** recoding mode, the yellow  icon displays when there is no event, and the DVR is not recording. When the DVR is in the **Pre-Event** mode, the red  and  display when any event occurs and the DVR starts recoding.

When the DVR is in the **Time & Event** mode, the DVR will follow the Time settings and the  icon displays at the top-left corner of the screen. The DVR follows the Event settings and the  icon displays.

Highlight the box under the **Channels** heading and press the  button to select which cameras will be recorded. (Simple Mode Only)

Highlight the box under the **Settings** heading and press the  button to define the recording settings.

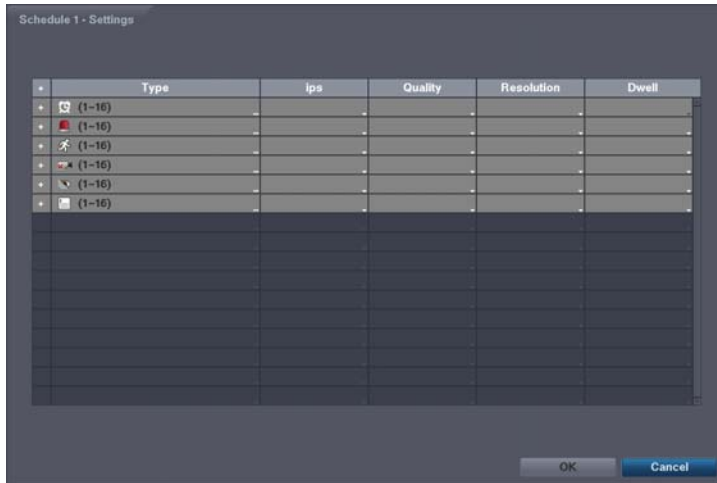

Figure 15: Schedule – Settings (Advanced Mode) setup screen.

You can set the ips, Quality and Resolution (ips, Quality, Resolution and Dwell for Advanced Mode setup) of the recording for any modes you set up in the Mode column. If you do not set the ips, Quality, Resolution and Dwell in the Settings column, the DVR will follow the default settings. See below for details.

NOTE: Descriptions of the Record icons in the *Type* column are as follows:

-  Time-lapse (Time)  Alarm-In  Motion
-  Video Loss  Video Blind  Text-In

Channels that are not defined will use the setting values of the previous schedule item.

When multiple events are detected at the same time from a specific channel, the DVR will record event video with the high setting values if the ips, Quality, Resolution and Dwell values of events are different from each other. However, the ips will be reset to the supported maximum value when the ips, Quality, Resolution and Dwell are all set to the highest value. (Advanced Mode Only)

Highlight the box under the  heading and press the  button to delete the recording settings. You will be asked to confirm that you want to delete the settings.

Highlight Default... and press the  button. The Default screen appears.

Highlighting boxes under **ips** and pressing the  button allows you to set the images per second for Time and Event recording. You can select from 1.00 to 30.00 ips (25.00 ips PAL).

Highlighting boxes under **Quality** and pressing the  button allows you to set the recorded image quality for Time and Event recording. You can select from: Very High, High, Standard and Basic.

Highlighting boxes under **Resolution** and pressing the  button allows you to set the recorded image resolution for Time and Event recording. You can select from: Very High (D1), High (Half D1) and Standard (CIF).

Highlighting boxes under **Dwell** and pressing the  button allows you to set the length of time you would like to record for the associated event. (Advanced Mode Only)

Pre-Event

Figure 16: Record – Pre-Event setup screen.

When the DVR is in the Event Record mode it is possible to have it record images before the event occurs. The **Pre-Event** screen allows you to define how to handle pre-event recording. If you do not have Event set up in the Record Schedule, a message will display alerting you to this fact.

You can turn individual cameras On or Off for pre-event recording. The image speed can be set from 1.00 to 30.00 ips (25.00 ips PAL), image quality can be selectable from Very High, High, Standard and Basic, and image resolution can be selectable from Very High (D1), High (Half D1) and Standard (CIF).

You can set the amount of time to record prior to the event by adjusting the Dwell. You can set the Dwell from 5 seconds to 30 minutes. The longer the dwell set, the fewer maximum ips can be set.

NOTE: When the DVR is in the Time or Time & Event mode, it ignores the pre-event settings and follows the time settings.

Event Setup

Motion

Figure 17: Event – Motion setup screen.

Your DVR has built-in video motion detection. Video motion detection can be turned On or Off for each camera.

Highlighting the box under the Sensitivity heading and pressing the button allows you to adjust the DVR's sensitivity to motion for Daytime and Nighttime independently. There are five settings with 1 being the least sensitive and 5 being the most sensitive.

You can define the area of the image where you want to detect motion; e.g., a doorway. Highlight the box under the Zone heading, and press the button. The Motion Zone screen displays.

The Motion Zone screen is laid over the video for the selected camera. You can set up motion zones by selecting or clearing blocks.

NOTE: You can set up motion zones one block at a time in groups of 16 individual block groups. A block group is positioned within the image area using the Up and Down arrow buttons, and individual blocks within the block groups are selected or cleared using the camera buttons.

Press the button to display the menu screen. The menu on the setup screen has the following functions:

- Select – Activates highlighted blocks to detect motion.
- Clear – Deactivates highlighted blocks so that they will not detect motion.
- Reverse – Activates inactive highlighted blocks and deactivates active highlighted blocks.
- Select All – Activates all blocks to detect motion.
- Clear All – Deactivates all blocks so that they will not detect motion.
- Reverse All – Activates inactive blocks and deactivates active blocks.
- Zone View – Displays any detected motion within the zone in red.
- OK – Accepts changes and closes Zone setup.
- Cancel – Exits Zone setup without saving changes.

You can adjust the minimum number of detection blocks that must be activated to trigger a motion alarm. Highlighting the box under the Min. Blocks heading and pressing the  button allows you to adjust the minimum number of detection blocks for Daytime and Nighttime independently. Smaller numbers provide greater sensitivity because fewer detection blocks must be activated.

Turning Zone View On will allow you to observe how the DVR is reacting to motion. When in the motion viewing mode, the detection zone of video will be displayed. Any detected motion within the zone will be displayed in red.

Highlight the box under the Actions and press the  button. The DVR can be set to react to motion differently for each camera. Each camera can be associated with another camera, trigger an Alarm-Out connector, sound the DVR's internal buzzer, notify a number of different devices, and/or move PTZ cameras to preset positions.

You can control excessive event logging and remote notification of motions detected after the motion dwell time by adjusting the motion ignoring dwell intervals. Highlight the box beside Motion Ignoring Interval and press the  button. A list of intervals ranging from 1 to 10 seconds or Never appears. The DVR will not log and notify motion events occurred during the preset interval range.

NOTE: The record action for motion events will not be affected by the Motion Ignoring function.

Highlighting Daytime Setup and pressing the  button allows you to set up the Daytime range.

Highlight the box beside Daytime and press the  button. Use the Up and Down arrow buttons to set the Daytime range. The DVR will consider the remaining time range as the Nighttime.

Alarm-In

Figure 18: Event – Alarm-In setup screen.

The alarm terminal strip on the back of the DVR has inputs associated with each alarm. You can set up each input on the Alarm-In screen. You can turn each input On or Off by highlighting the alarm number and pressing the  button.

Each input can be given a title. Highlight the desired Title box and press the  button. A virtual keyboard appears allowing you to enter a title name.

Each input can be set as NO (normally open) or NC (normally closed).

Highlight the box under the **Actions** and press the  button. You can set the actions the DVR will take whenever it senses an input on one of its alarm input connectors. Alarm input can be associated with cameras, trigger an Alarm-Out connector, sound the DVR's internal buzzer, notify a number of different devices, and/or move PTZ cameras to preset positions.

Video Loss

Figure 19: Event – Video Loss setup screen.

Highlighting the box under the **Video Loss Interval** heading allows you to set the duration of a signal loss before the DVR will report a Video Loss. The DVR will not consider any signal loss from a camera to be a Video Loss if the detected signal loss is shorter than the interval set on this screen.

Highlight the box under the **Actions** and press the  button. The DVR can be set to react to video loss differently for each camera. Each camera can be associated with another camera, trigger an Alarm-Out connector, sound the DVR's internal buzzer, notify a number of different devices, and/or move PTZ cameras to preset positions.

Highlight **Use Ignoring Time** and press the  button to toggle between On and Off. When set to On, the DVR will ignore video loss events occurring during the preset period. Highlighting **Time Setup** and pressing the  button allows you to set up event ignoring time.

Video Blind

Figure 20: Event – Video Blind setup screen.

The DVR checks to see if anything is blinding a camera.

Highlighting the box under the **Sensitivity** heading allows you to adjust the DVR's sensitivity to video blind for Black and White independently from 0 (Never) and 1 (least sensitive) to 15 (most sensitive).

NOTE: Video blind might NOT be detected for a camera with a very noisy image especially when set for low sensitivity values.

Highlighting the box under the **Activation Time** heading allows you to set the duration before the DVR will report a Video Blind. The DVR will not consider any blinded camera to be a Video Blind if the detected blindness is less than the Activation Time set on this screen.

Highlight the box under the **Actions** and press the button. The DVR can be set to react to video blind differently for each camera. Each camera can be associated with another camera, trigger an Alarm-Out connector, sound the DVR's internal buzzer, notify a number of different devices, and/or move PTZ cameras to preset positions.

Highlight **Use Ignoring Time** and press the button to toggle between On and Off. When set to On, the DVR will ignore video blind events occurred during the preset period. Highlighting **Time Setup** and press the button allows you to set up event ignoring time.

Text-In

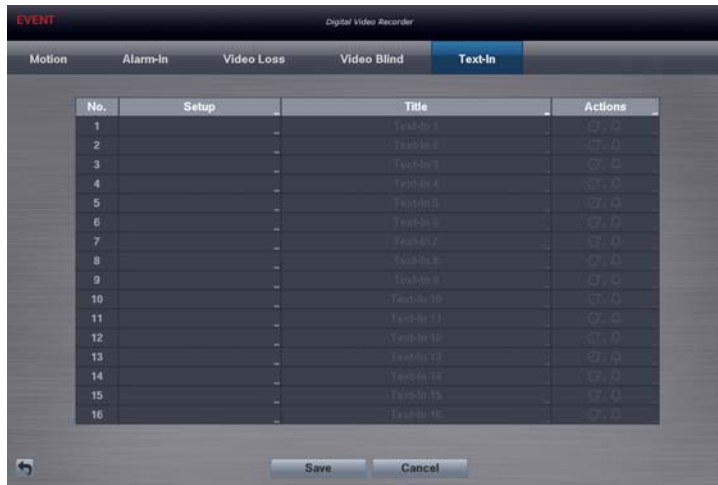

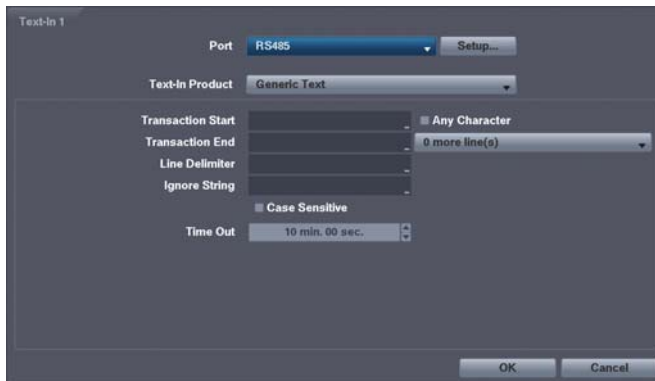

Figure 21: Event – Text-In setup screen.

The DVR can be set to react to text input from devices such as ATMs (Automated Teller Machines) and POS (Point of Sale; i.e., cash registers). This screen allows you to configure the DVR for each text-in device.

Highlight the box under the **Setup** heading, and press the button. Selecting the **Setup** heading changes all the parameters excluding Port settings of all the text input channels.

NOTE: The system performance might be affected when a large quantity of text inputs are detected from several channels at the same time.

Highlight the box beside **Port**, and press the button. Select from None, RS232, RS485, USB-Serial (1~8) and LAN (1~16).

NOTE: If you have set the **Port** as **None**, you will not be able to make any changes to the screen.

When using the USB to serial text-in device, do NOT remove the USB cable from the port while the system is running.

Text-in data might be lost when the text-in buffer is filled by simultaneous text-in transactions from all 16 LAN channels.

Highlight **Setup...**, and press the button. Use the ATM or POS manufacturer's recommended settings when configuring the RS232, RS485, USB-Serial or LAN ports.

Highlight the box beside **Text-In Product**, and press the button. Select your device from the list.

NOTE: The following description is for a Generic Text Device. The screen changes for different types of text input devices, and there will be different parameter boxes for you to enter information.

Highlight the box beside **Transaction Start**, and press the  button. Use the virtual keyboard to enter the Transaction Start string. Refer to the device manufacturer's documentation for the text string that the device first sends when a transaction starts.

If you want the DVR to react to any character sent from the text input device, you will want to turn **On Any Character**. Highlight **Any Character**, and press the  button to toggle between On and Off.

NOTE: If Any Character is turned On, you will not be able to enter any text in the Transaction Start box.

Highlight the box beside **Transaction End**, and press the  button. Use the virtual keyboard to enter the Transaction End string. Refer to the device manufacturer's documentation for the text string that the device sends when a transaction ends.

Highlight the **more line(s)** box, and press the  button. Select the number of additional lines of text that you want the DVR to record. You can choose from 0 to 10.

Highlight the box beside **Line Delimiter**, and press the  button. Use the virtual keyboard to enter the character(s) that the device uses to indicate the end of a line. Special characters can be created using ^ and a capital letter; e.g., ^J for NL (New Line), ^M for CR (Carriage Return). Refer to the device manufacturer's documentation for Line Delimiter character(s).

Highlight the box beside **Ignore String**, and press the  button. Use the virtual keyboard to enter any strings of text that you want the DVR to ignore. Refer to the device manufacturer's documentation for text strings that the device sends during transactions, so you will know which ones you do not want recorded.

Highlight the **Case Sensitive** box, and press the  button to toggle between On and Off. Refer to the device manufacturer's documentation to determine if the text strings are Case Sensitive. If the device distinguishes between upper and lower case letters, make certain the **Case Sensitive** box is turned On.

Highlight the box beside **Time Out**, and press the  button. Set the length of time to wait for the new text string. The DVR will consider a transaction complete if no new text strings are entered between the last text input and the dwell time out. You can adjust the Time Out dwell from 5 seconds to 15 minutes.

Each input can be given a title. Highlight the desired **Title** box and press the  button. A virtual keyboard appears allowing you to enter a title name.

Highlight the box under the **Actions** and press the  button. The DVR can be set to react to text input. Text input can be associated with cameras, trigger an Alarm-Out connector, sound the DVR's internal buzzer, notify a number of different devices, and/or move PTZ cameras to preset positions.

Camera Setup

General

Figure 22: Camera – General setup screen.

You can turn the camera number On or Off, and you can change the Title of each camera using the virtual keyboard. You can also determine which cameras will display on the monitors by selecting Normal, Covert 1 or Covert 2 from a drop-down list in the Use column.

NOTE: When selecting the *Covert 1*, the DVR displays the camera title and status icons on the covert video. When selecting the *Covert 2*, the DVR displays only camera title on the covert video.

A user who does not have *Covert Camera View* authority cannot view video from cameras set to *Covert 1* or *Covert 2* in both the live monitoring and playback modes.

You can select the width resolution supported by the camera between 720 and 960 by highlighting the box under the Mode heading and pressing the button.

NOTE: The system restarts automatically after changing the resolution settings.

When selecting the 960 Mode, the total recording speed and playback speed will decrease.

PTZ

Figure 23: Camera – PTZ setup screen.

NOTE: You will only be able to set up PTZ devices if the PTZ port is set to RS485.

Highlight the box in the Product column for the PTZ camera you wish to configure and press the button. A list of PTZ devices appears. Select your camera from the list and press the button. You will need to connect the camera to the RS485 connector on the back of the DVR following the camera manufacturer's instructions.

You can assign IDs to each camera by highlighting the box under the ID heading and pressing the button. Change the number by highlighting it and using the Up and Down arrow buttons to increase and decrease the number. The PTZ ID number can be set from 0 to 256.

Highlight the Setup... box and press the button. The Port Setup window appears.

Configure the port's setting based on the PTZ camera manufacturer's instructions.

Device Setup

Alarm-Out

Figure 24: Device – Alarm-Out setup screen.

Highlighting the box beside Dwell Time and pressing the  button allows you to set the dwell time of the alarm output. Dwell times range from 5 seconds to 30 minutes.

Each alarm output can be given its own title by highlighting Title... and pressing the  button. A virtual keyboard appears allowing you to enter the title.

Network Setup

General

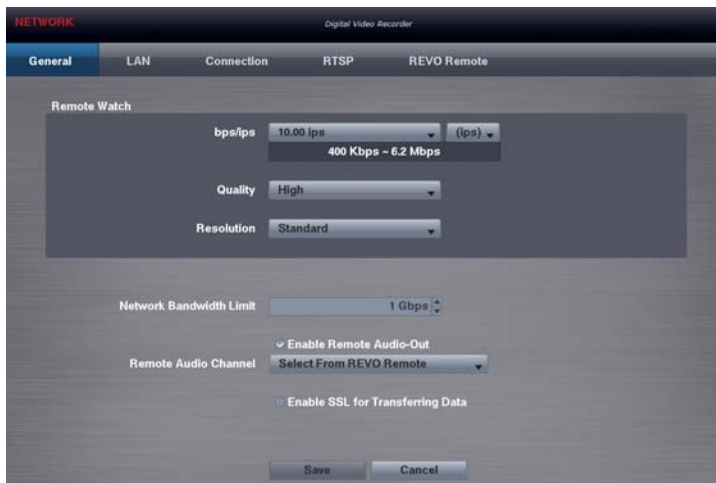

Figure 25: Network – General setup screen.

Highlight the first box beside Remote Watch – bps/ips. You can select the Transfer Speed from 50Kbps to 1Gbps.

Highlight the second box beside Remote Watch – bps/ips. You can select the unit of measure for the transfer speed between: bps and ips. Press the button to set the transfer speed.

Highlight the box beside Remote Watch – Quality and press the button. You can select the Quality from: Very High, High, Standard and Basic. Press the button to set the Quality.

Highlight the box beside Remote Watch – Resolution and press the button. You can select the Resolution from: Very High, High and Standard. Press the button to set the Resolution.

NOTE: The higher Quality and Resolution settings require higher Transfer Speed settings. The transfer speed you set is the maximum speed. Depending on the network environment, this speed may not be achieved.

You can limit the network bandwidth settings so that system does not consume too much network bandwidth. Highlight the box beside Network Bandwidth Limit and press the Up and Down arrow buttons to set the desired maximum bandwidth from 100Kbps to 1Gbps.

NOTE: When limiting the network bandwidth, the remote watch image on the PC running REVO Remote Pro or REVO Remote might not be displayed properly.

The DVR supports two-way audio communication between a local system and a PC running REVO Remote Pro. Highlight Enable Remote Audio-Out and press the button to toggle between On and Off. Highlighting the box beside Remote Audio Channel and pressing the button allows you to select the audio channel that sends audio to the remote site. Selecting Select From REVO Remote will send audio of the channel selected from REVO Remote Pro.

NOTE: Depending on network conditions, audio might be interrupted or out of synchronization during transmission.

Highlight Enable SSL for Transferring Data and press the button to toggle between On and Off. When it is On, the security of data except video and audio transmitted for remote monitoring or remote recording can be enhanced by using the SSL (Secure Sockets Layer) authentication. When using the SSL function, the DVR cannot be connected with a remote program or a network keyboard which does not support the SSL function.

CAUTION: The remote connection will be disconnected temporarily after changing the SSL settings.

NOTE: While the SSL function is enabled, the network transfer speed you selected may not be achieved. This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>).

LAN

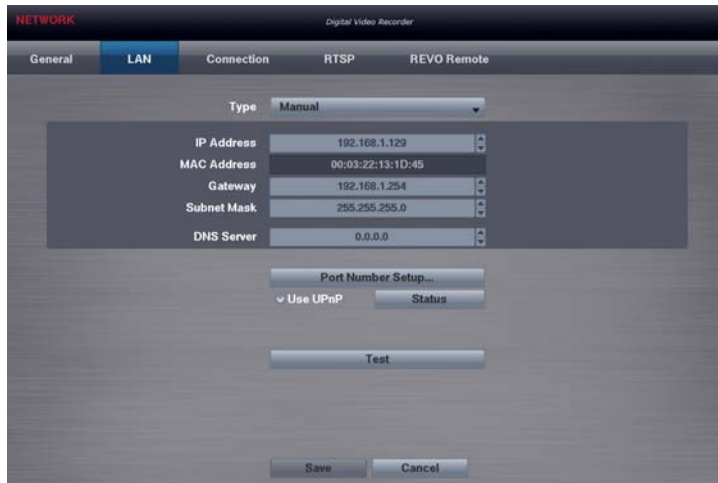

Figure 26: Network – LAN setup screen.

Highlight the box beside Type and press the button. You can select the type of network configuration from: Manual, DHCP and ADSL (with PPPoE). Select the desired type and press the button.

Selecting Manual from the Type allows you to set up LAN parameters manually.

Change the numbers by highlighting them and using the Up and Down arrow buttons to increase or decrease the number. The factory default LAN settings are:

IP Address: 192.168.1.129
 Gateway: 192.168.1.254
 Subnet Mask: 255.255.255.0

NOTE: You will need to get the appropriate IP Address, Gateway and Subnet Mask from your network administrator.

Highlight the box beside DNS Server. Press the Up and Down arrow buttons to set the IP address of the DNS server.

Highlight the Port Number Setup... box and press the button. The Port Number Setup screen appears.

NOTE: You will need to get the appropriate Port Numbers for each REVO Remote Pro and REVO Remote related program (Admin, Callback, Watch and Search) from your network administrator.

Change the numbers by highlighting them and using the Up and Down arrow buttons to increase or decrease the number. The factory default Port settings are:

Remote Admin: 8200
 Remote Callback: 8201
 Remote Watch: 8016
 Remote Search: 10019

NOTE: The system restarts automatically after changing the port settings.

Do NOT use the same port number for two different programs, otherwise, the DVR cannot be connected with the PC running REVO Remote Pro or REVO Remote.

CAUTION: When changing the port settings, you must change the port settings on the PC running REVO Remote Pro as well. Refer to the REVO Remote Pro manual for details.

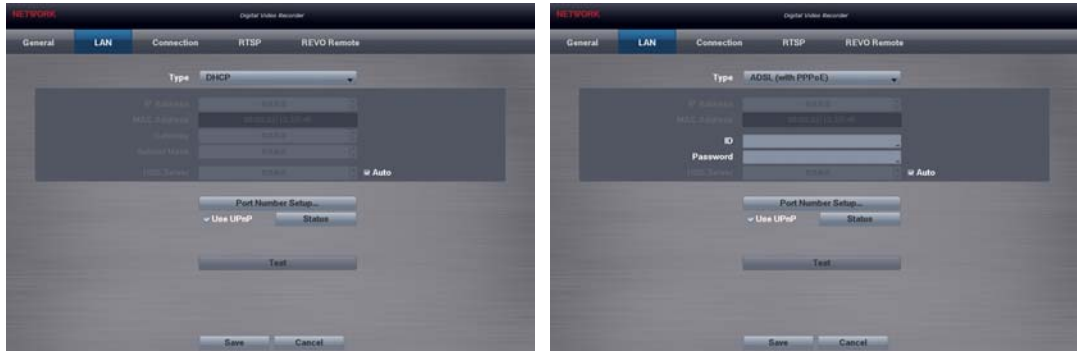

Highlight **Use UPnP** and press the  button to toggle between On and Off. When it is On, port forwarding from the NAT (Network Address Translation) device to the DVR will be enabled automatically via UPnP (Universal Plug and Play) service. This function will be especially useful when accessing a port on a private IP address.

NOTE: For the UPnP service to work, the NAT device should support the UPnP Port Forwarding function and the function should be set to enabled.

You cannot change the port settings when Use UPnP is On.

Highlight the **Status** box and press the  button to display the port numbers forwarded from the NAT device via UPnP service.

Highlight the **Test** box and press the  button to test the current LAN settings you made.

Selecting **DHCP** from the **Type** and highlighting **Save** button reads the current IP address of the DVR configured by DHCP (Dynamic Host Configuration Protocol) network.

Highlight **Auto** (Default) and press the  button to toggle between On and Off. When it is On, the DVR will obtain the IP address of the DNS server automatically.

NOTE: Selecting Auto will only be enabled when the DVR is configured for DHCP or an ADSL network.

Selecting **ADSL (with PPPoE)** allows you to set up the ADSL network.

Highlight the box beside **ID** and press the  button. A virtual keyboard appears allowing you to enter the ID for ADSL connection.

Highlight the box beside **Password** and press the  button. A virtual keyboard appears allowing you to enter the password for ADSL connection.

NOTE: Entering the ID and Password and highlighting OK reads the current IP address of the DVR configured by the ADSL network.

If the DVR is configured for DHCP or an ADSL network, the IP address of the DVR might change whenever the unit is turned on.

Connection

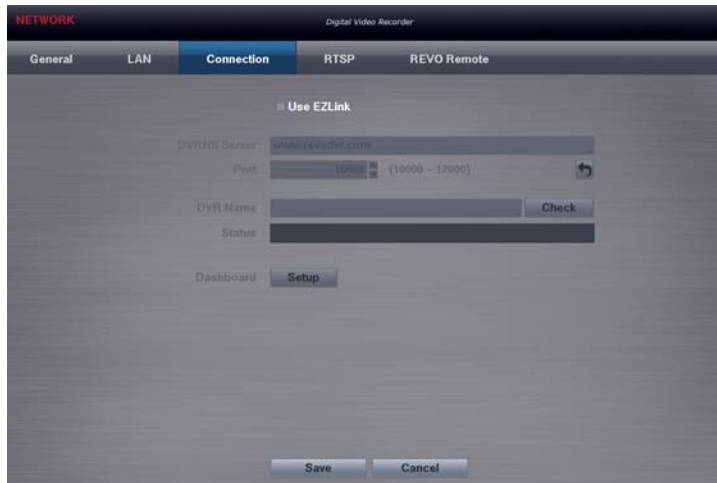

Figure 27: Network – Connection setup screen.

Highlight Use EZLink and press the button to toggle between On and Off.

NOTE: EZLink is the technology that automatically sets up your DVR to work seamlessly for remote viewing via your network internet connection. For EZLink to work, naming your DVR will be required.

Highlight the box beside DVRNS Server and press the button. A virtual keyboard appears allowing you to enter the IP address or domain name of the DVRNS server.

NOTE: You will need to get the IP Address or domain name of the DVRNS Server from your network administrator.

You can use the domain name instead of IP address if you already set up the DNS Server when setting up the LAN.

Highlight the box beside Port and press the button. Set the port number of the DVRNS server using the Up and Down arrow buttons to increase or decrease the numbers.

Highlight the box beside DVR Name and press the button. A virtual keyboard appears allowing you to enter the DVR name to be registered on the DVRNS server.

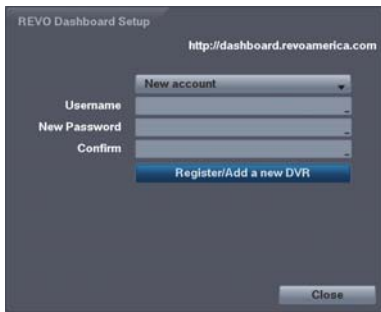

Highlight the Check box and press the button to check whether or not the name you entered can be used.

NOTE: The DVR Name you entered should be checked by selecting Check, otherwise the EZLink changes will not be saved.

When entering no name or a name already registered on the DVRNS server, an error message displays.

The box beside Status displays the current information of the Rendezvous server and NAT (Network Address Translation) device.

Highlight the Setup box beside Dashboard and press the button to set up the Dashboard.

Select **New account** if you want to create a new Dashboard account, and select **Existing account** if you want to use your existing Dashboard account. Highlight the box beside **User ID/New Password (Confirm)** and press the button. A virtual keyboard appears allowing you to enter the user ID and password for your Dashboard account. Highlighting the **Register/Add a new DVR** and pressing the button registers the DVR on the REVO Dashboards.

RTSP

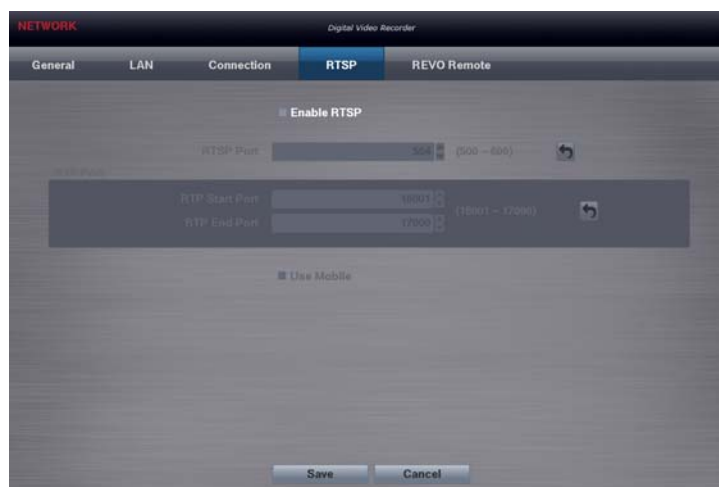

Figure 28: Network – RTSP setup screen.

Highlight **Enable RTSP** (Real-Time Streaming Protocol) and press the button to toggle between On and Off. You will be able to change the settings if **Enable RTSP** is enabled.

Highlight the box beside **RTSP Port** and press the button. Set the port number of the RTSP server obtained from your system administrator.

Highlight the box beside **RTP Start Port** and press the button. Set the start port number of the RTP server obtained from your system administrator.

Highlight the box beside **RTP End Port** and press the button. Set the end port number of the RTP server obtained from your system administrator.

Highlight **Use Mobile** and press the button to toggle between On and Off. When set to on, you can access a remote DVR using a Blackberry or other mobile devices.

NOTE: Selecting *Use Mobile* sets the REVO Remote service to be enabled automatically regardless of your REVO Remote settings.

When using NAT (Network Address Translation) or firewall services, opening all UDP ports allows you to access a DVR using Blackberry and Android devices.

You can access a remote DVR and monitor live video images using media players, such as VLC Player, supporting RTSP service. Start the media player on your local PC and enter “rtsp://ID:Password@IP address:RTSP port number/trackID=‘channel number’”, or start Internet Explorer on your Blackberry or other mobile devices and enter “http://IP address:REVO Remote port number/”.

NOTE: Some media players might play video properly depending on network conditions.
 RTSP service might not be supported, depending on the type of media player.

REVO Remote

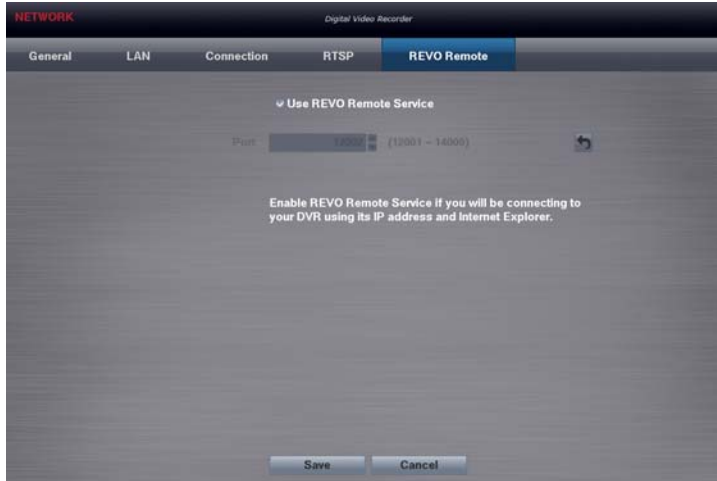

Figure 29: Network – REVO Remote setup screen.

Highlight Use REVO Remote Service and press the button to toggle between On and Off. See *Appendix – REVO Remote* for detailed descriptions of the REVO Remote service.

Highlight the box beside Port and press the button. Set the port number used when accessing REVO Remote by using the Up and Down arrow buttons to increase or decrease the numbers.

Notification Setup

Callback

Figure 30: Notification – Callback setup screen.

The DVR can be set up to contact a computer running REVO Remote Pro (Remote Administration System) when an event occurs. Highlight the box under the **No.** heading and press the button to toggle between On and Off. You will only be able to change the IP addresses if **No.** is enabled.

Highlight the **IP Address** box that you want to change and press the button. Use the arrow buttons to enter the IP address of the computer you want contacted during an event. You can enter up to five IP addresses.

Highlight the box beside **Retry** and enter the number of times you would like the DVR to try contacting the computer. You can select from 1 to 10 retries.

Push

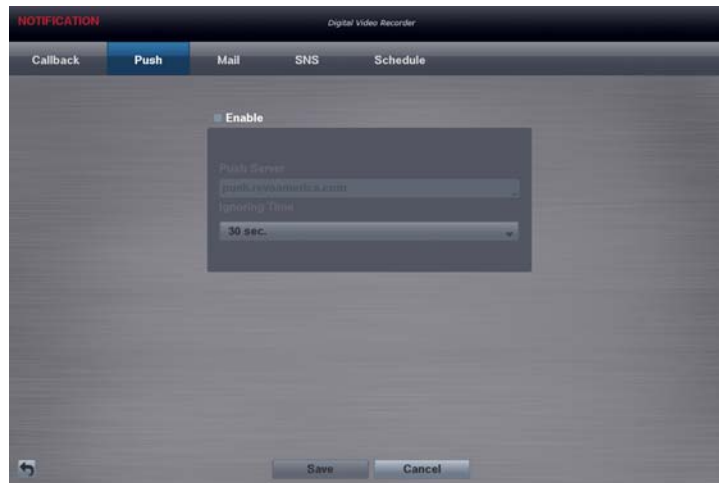

Figure 31: Notification – Push setup screen.

Highlight **Enable** and press the button to toggle between On and Off. When it is On, you can set up the push server.

Highlight the box beside **Ignoring Time** and press the button. A list of intervals ranging from 30 seconds to 5 minutes appears. The DVR will not send callback messages during the preset interval range.

Mail

Figure 32: Notification – Mail setup screen.

The DVR can be set up to send an email when an event occurs. The Mail Group and Recipient can be turned On or Off by highlighting the boxes beside the individual mail group and recipient accounts and pressing the button. Highlighting the box beside “Group & Recipient” and pressing the button will toggle between all mail accounts being turned On and Off.

The +/- column is used to collapse and expand recipient groups. If there is a + or – in this column, it indicates the item is a Group Name. If there is a – in front of the Group Name, it indicates that the group has been “expanded” and all of the Recipient Names within that group are displayed below the Group Name. If there is a + in front of the Group Name, it indicates that the group has been “collapsed” and all of the Recipient Names within that group are hidden. To collapse or expand a group, highlight the +/- column in front of the desired group and press the button.

The ✕ column can be used to delete a Recipient Name or an entire Group. If the ✕ is grayed out, that Group or Recipient cannot be deleted. Highlight the ✕ and press the button. You will be asked to confirm that you want to delete the Recipient or Group.

Highlight the + Group and press the button to add a recipient Group and select the image file format attached to an email.

Highlight the box beside **Group** and press the button. A virtual keyboard appears allowing you to enter the Group name.

Highlight the box beside **Attach Type** and press the button. You can select between CBF and JPG. When selecting CBF, the DVR will attach an event detected video clip to an email. When selecting JPG, the DVR will attach the event detected image file (JPEG format) to an email.

Highlight the + Mail and press the button to add a mail Recipient.

Highlight **Use** and press the button to toggle between On and Off. Assign the Recipient to a Group and enter the Recipient's Display Name.

Highlight the box beside **Address** and enter the recipient's e-mail address and mail server provider. Highlighting allows you to select the mail server provider from a list of registered SMTP mail server providers.

Highlight the box under the **Attach Type** heading and press the button to change the image file format attached to an email.

NOTE: Attaching a image file to an email will not be available for the Text-In event.

Highlight **SMTP Setup...** and press the button. The SMTP Setup screen appears.

Highlight the box beside **SMTP Server** and press the button. A virtual keyboard appears that you can use to enter the IP address or domain name of the SMTP server. Highlighting allows you to select your SMTP server from a list of registered SMTP servers.

NOTE: You will need to get the IP Address or domain name of the SMTP Server from your network administrator.

You can use the domain name instead of IP address if you already set up the DNS Server when setting up the LAN.

Highlight the box beside **Port** and press the button. Use the arrow buttons to enter the SMTP Server port number obtained from your system administrator. The default port number is 25.

Highlight **Use SSL/TLS** and press the button to toggle between On and Off. When it is On, the DVR can send an email via an SMTP server requiring SSL (Secure Sockets Layer) authentication.

NOTE: This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>).

Highlight the box beside **Authentication** and press the button. An Authentication screen appears. Highlight **Use** and press the button to toggle between On and Off. Highlight the box beside **User/Password** and press the button. A virtual keyboard appears allowing you to enter the user ID and password.

Highlight the box beside **Sender** and enter the sender's e-mail address. Use the virtual keyboard to enter the e-mail address.

Highlight the box beside **Display Name** and enter the Sender's Display Name. Highlight the box beside **Address** and enter the sender's e-mail address and mail server provider. Highlighting allows you to select the mail server provider from a list of registered mail server providers.

Highlight the **Test** box and press the button to test emailing with the current settings you made.

SNS

Figure 33: Notification – SNS setup screen.

The DVR can be set up to post a message via SNS (Social Network Service) when an event occurs. You can add and edit the SNS account on this screen. The SNS account can be turned On or Off by highlighting the boxes under the No. heading and pressing the button.

To add an SNS account, highlight the + and press the button. Highlight the box beside Type and press the button. Selecting Twitter from the Type allows you to post a tweet on Twitter when an event occurs.

Highlight the box beside User Name/Password and press the button. A virtual keyboard appears allowing you to enter the user name and password.

The SNS accounts can be deleted by highlighting the beside the account and pressing the button.

NOTE: Posting a tweet might fail because of Twitter limitations.

Schedule

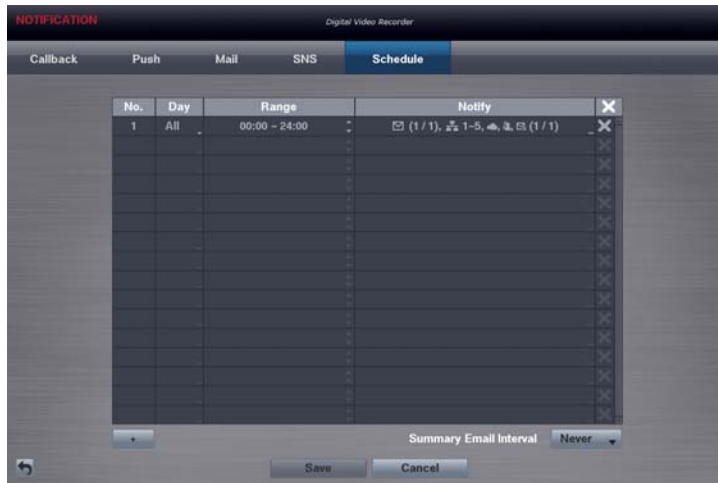

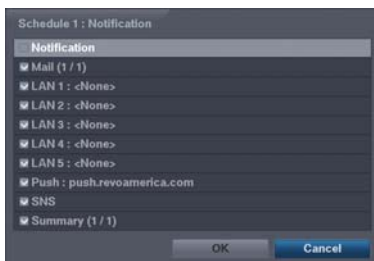

Figure 34: Notification – Schedule setup screen.

You can add and edit notification schedules on this screen. Highlight the + and press the button to add a schedule. Highlighting the boxes under the Column heading and pressing the button allows you to edit the information in those boxes.

The Day box allows you to select the days that the notification schedule will be active. The choices are: Sun, Mon, Tue, Wed, Thu, Fri, Sat, M~F, Hol and All.

The Range box allows you to set the time that the notification schedule will be active in 15-minute increments from 00:00 to 24:00.

Highlight the desired box under the Notify heading, and press the button. The Schedule Notify menu appears.

You can toggle the entire list On and Off by highlighting Notification and pressing the button. You can toggle the individual items On and Off by highlighting that item and pressing the button. Highlight OK and press the button to accept your changes.

NOTE: For the Notify action, the notify item you select should be enabled in the Notification setup screen and the DVR should be registered in the REVO Remote Pro (Remote Administration System).

The Notify action for system events you made in the System Event setup screen on the System menu will not be affected by your Notification Schedule settings.

Highlight the box beside Summary Email Interval and select the interval that you want the DVR to send a summary email. The DVR will send an email containing a summary of events detected during the preset interval.

Display Setup

OSD

Figure 35: Display – OSD setup screen.

Highlighting an item and pressing the  button toggles that item On and Off. When an item is On, there is a checkmark in the box beside it. The following items can be turned On or Off:

- Remote Control – The icon  displays when the DVR can be controlled by the infrared remote control.
- Zoom – The icon  displays on the enlarged video.
- Network – The icon  displays when the unit is connected to a network via Ethernet. The icon  displays on each camera when audio communication is available between the DVR and a PC running REVO Remote Pro via Ethernet.
- Freeze & Sequence – The icon  displays while in the Freeze mode, and the  displays while in the Sequence mode.
- Screen Group – The number of screen group displays when the DVR is not in the 4x4 display mode.
- Free Space – The icon  displays when the DVR is in the Recycle mode, and the percentage of available storage space displays when the DVR is not in the Recycle mode.
- Date/Time – The current date and time information displays.
- User Name – The name of the current user logged in displays.
- Background Panel – The background panel at the bottom of the screen displays in black.
- Camera No. – The camera number displays at the top-left corner of each camera screen.
- Camera Title – The camera title displays at the top-left corner of each camera screen.
- Record – The record related icons display on each camera screen.
- Audio – The icon  displays on each camera screen for which the DVR can play live audio.
- PTZ – The icon  displays on each PTZ camera screen.
- Text-In – The text input strings display on the screen. You can adjust the Display Dwell time (sec.) for the text input strings displayed on the screen.

You can adjust the transparency of the setup screens by highlighting Transparency and using the Left and Right arrow buttons.

Highlighting OSD Margin... and pressing the  button displays how OSD text will be displayed on the monitor. You can adjust the horizontal and vertical margins so that text and icons will not be hidden beyond the edges of the monitor.

Main Monitor

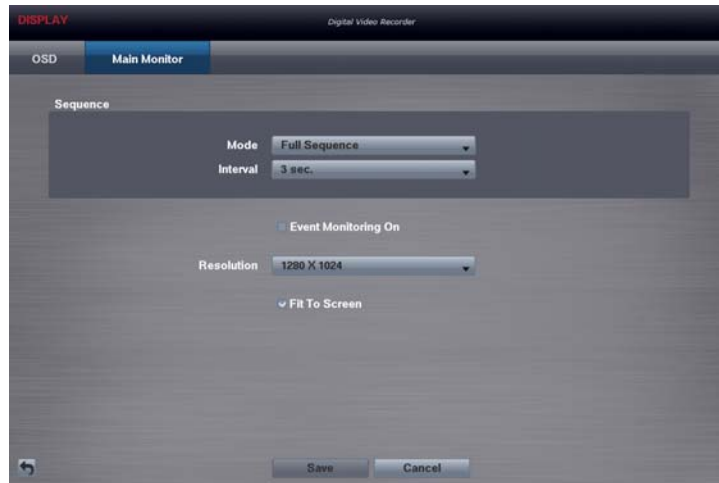

Figure 36: Display – Main Monitor setup screen.

Highlight the box beside **Mode** and press the button. You can select between Full Sequence and Cameo Sequence.

Pressing the **SEQUENCE** button causes the DVR to sequence cameras, and the DVR can sequence cameras in two modes: “Full” and “Cameo”. In the Full mode, the DVR sequences through the cameras and displays them full screen. In the Cameo mode, the bottom right window in a multi-screen format sequences through the cameras.

NOTE: Any cameras that are Off, have lost video or are set to Covert (unless the user has authority to view covert cameras) will be excluded from the Cameo sequence.

You can define the screen layout in a variety of formats and set the DVR to sequence through the different screen layouts (pages) so that all the cameras will be displayed. You can also set up the DVR to display one camera or a group of cameras all the time while cycling through the remaining cameras in a “cameo” window. This can be done with one camera displayed full screen while displaying the cameo window as a PIP (picture in picture), or displaying the cameras in a grid pattern with the bottom right window as the cameo.

NOTE: Sequence cannot be used in the 4x4 display mode.

You can adjust the display dwell time by highlighting the box beside **Interval** and pressing the button. You can select dwell intervals ranging from 1 second to 1 minute.

Highlight **Event Monitoring On** and press the button. Pressing the button toggles between On and Off. When it is On, the DVR will display the camera associated with the event when an event occurs.

Highlight the box beside **Resolution** and press the button. You can select from 1280x1024, 1440x900 and 1920x1080 for NTSC video, and 1280x1024, 1440x900 and 1920x1080 (@ 60Hz or 50Hz) for PAL video.

NOTE: When the individual main monitors are connected to the HDMI and VGA connectors for simultaneous operation, it is recommended to use monitors supported with the same resolution. If monitors unsupported with the same resolution are connected, video cannot be displayed on the monitor with the resolution you have set.

Highlight **Fit To Screen** and press the button. Pressing the button toggles between On and Off. When it is On, the DVR will resize video to fit the main monitor screen.

Chapter 4 — Operation

NOTE: This chapter assumes your DVR has been installed and configured. If it has not, please refer to Chapters 2 and 3.

Turning on the Power

Once you have installed the DVR following the instructions in *Chapter 2 — Installation*, it is ready to record.

Live Monitoring

As soon as the DVR completes its initialization process, it will begin showing live video on the attached monitor and playing live audio through the attached speaker. The default mode is to display all cameras at once. Pressing any camera button will cause that camera to display full screen. It displays live video and plays live audio until the user enters another mode.

While in the live monitoring mode, pressing the **MENU** button displays the following Live Monitoring menu on the right edge of the screen. Pressing the **MENU** button again hides the menu. You can navigate through menus and items by pressing the arrow buttons.

Figure 37: Live Monitoring menu.

NOTE: The Live Monitoring menu also can be displayed by moving the mouse pointer on the right edge of the screen.

Live Monitoring Menu

Login/Logout

Selecting **1** (Login) in the Live Monitoring menu accesses the Login screen, and you will be asked to select a User and enter the password to log into the system. Selecting **2** (Logout) in the Live Monitoring menu displays the Logout screen asking you to confirm whether or not you want to log out the current user.

Display

- **Full Screen:** Selecting  (Display) →  (Full Screen) and choosing the camera number button displays the selected camera full screen. It is the same as pressing the individual camera buttons on the remote control or clicking the left mouse button on a camera image when in one of the multiview formats (i.e., 2x2, 1+5, 1+7, 3x3 or 4x4). Clicking the left mouse button on the screen again returns to the previous display mode.
- **PIP, 2x2, 1+5, 1+7, 3x3, 4x4:** Selecting  (Display) → , , , ,  or  (PIP, 2x2, 1+5, 1+7, 3x3 or 4x4) displays the cameras in the selected multiview screen mode (PIP, 2x2, 1+5, 1+7, 3x3 or 4x4). Selecting each display mode is the same as pressing the **LAYOUT** button or scrolling the mouse wheel up and down when in one of the multiview formats (i.e., 2x2, 1+5, 1+7, 3x3 or 4x4).

NOTE: In the 1+5 or 1+7 display mode, the main channel indicates the channel displayed on the large screen which is displayed in the top-left. You can select the camera you want to display on the main channel screen. Select a channel on the screen and click the right mouse button to display the Camera Menu. Selecting *Go To Main* swaps the selected channel with the main channel. This function is supported only in the 1+5 and 1+7 display modes and can be activated from any of channel screens except the main channel screen.

- **Camera OSD, Status OSD:** Selecting  (Display) → Camera OSD or Status OSD toggles Camera OSD or Status OSD On and Off.

Previous Group, Next Group

Selecting  or  (Previous Group or Next Group) in the Live Monitoring menu moves to the previous or next page. It is the same as pressing the Left or Right buttons on the remote control.

Freeze

Selecting  (Freeze) in the Live Monitoring menu will freeze the current image on the screen until you select  again. Pressing any button except for the **MENU** and **PANIC** buttons while in the Freeze mode can also exit the Freeze mode. While in the Freeze mode, the icon  displays in bottom-left corner if **Freeze** is selected in the Display setup screen (OSD tab).

Alarm

Selecting  (Alarm) in the Live Monitoring menu resets the DVR's outputs including the internal buzzer during an alarm. It is the same as pressing the **ALARM** button.

Panic

Selecting  (Panic) in the Live Monitoring menu starts panic recording of all cameras, and selecting  again stops panic recording. It is the same as pressing the **PANIC** button.

Sequence

Selecting  (Sequence) in the Live Monitoring menu causes the cameras to display sequentially. It is the same as pressing the **SEQUENCE** button. When in one of the multi-view formats, selecting  will cause the DVR to go through predefined screen layouts (Full Sequence). Or, the bottom, right screen will display live cameras sequentially (Cameo Sequence). For example, if you select  in the 2x2 format, the DVR changes pages as follows:

< Full Sequence >

< Cameo Sequence >

Selecting  again in the Live Monitoring menu exits the Sequence mode. While in the Sequence mode, the  icon displays in bottom-left corner if Sequence is selected in the Display setup screen (OSD tab). If all the cameras in a page are Off, or have lost video or are set to Covert (unless the user has authority to view covert cameras), that page will be excluded from the sequence.

NOTE: The *Full Sequence* for the full sequence monitoring and the *Cameo Sequence* for the cameo sequence monitoring should be selected in the Display setup screen (Main Monitor tab).

Camera Menu

- **PTZ:** Selecting  (Camera Menu) → PTZ and choosing the camera number allows you to control the selected camera as long as it has Pan, Tilt and Zoom capabilities. It is the same as pressing the  button. Refer to the following *PTZ Mode* section for details.
- **Zoom:** Selecting  (Camera Menu) → Zoom and choosing the camera number zooms the current image of the selected camera on the screen. It is the same as pressing the  button. Selecting ZOOM again in the Camera Menu again exits the Zoom mode. Refer to the following *Zoom Mode* section for details.
- **Audio:** Selecting  (Camera Menu) → Audio toggles audio output On and Off.
- **Color Control:** Selecting  (Camera Menu) → Color Control and choosing the camera number allows you to control brightness, contrast, hue and saturation for each camera for the selected camera if a user who has Color Control authority logs into the system. It is the same as pressing and holding a camera button for a few seconds.
- **Edit Group:** Selecting  (Camera Menu) → Edit Group enters to the Active Cameo mode. It is the same as pressing the  button in any multiview formats. Refer to the following *Active Cameo Mode* section for details.

NOTE: It is important that cameras and monitors are correctly installed and adjusted prior to making any image adjustments using the DVR's controls.

Any image adjustments you make will be applied to both the live video on the monitors and the recorded video.

The *Camera Menu* also can be displayed by clicking the right mouse button on the screen while in the live monitoring mode.

Search

Selecting  (Search) exits the live monitoring mode and enters the search mode. It is the same as pressing any playback button on the remote control.

Setup

Selecting  (Setup) in the Live Monitoring menu enters the Main Setup screen. Refer to *Chapter 3 — Configuration* for detailed descriptions of system setup.

Status

Selecting  (Status) in the Live Monitoring menu allows you to check the status of the DVR's system, inputs and storage. Refer to the following *Status Monitoring* section for details.

NOTE: Selecting *Status* will only be enabled for a user who has *System Check* authority.

Active Cameo Mode

You can enter the Active Cameo mode by selecting *Edit Group* from the Live Monitoring – Camera menu or pressing the  button in any multi-view format. The yellow outline surrounding the video indicates the active cameo, and pressing the arrow buttons moves the active cameo. Pressing the  button exits the Active Cameo mode. The active cameo mode will remain in effect for 15 seconds if there is no further operation.

In active cameo mode, press the button for the camera you want to display in the active cameo. After setting the camera number to active cameo, the DVR moves the active cameo to the next cameo. When the camera number exists on the current screen, the active cameo is changed with the existing camera number. When the camera number does not exist on the current screen, the active cameo is replaced by the camera number. You can change the screen layout in this way.

Zoom Mode

You can enlarge an area of the video by pressing the **ZOOM** button. For a few seconds after pressing the **ZOOM** button, a rectangle displays on the screen. A rectangle shows the area that will be enlarged. You can move the rectangle around using the arrow buttons. Pressing the **↵** button in the Zoom mode enlarges the area in rectangle. Exit the Zoom mode by pressing the **ZOOM** button. While in the Zoom mode, the icon  displays if Zoom is selected in the Display setup screen (OSD tab).

PTZ Mode

If a user who has PTZ Control authority logs into the system, the user can control PTZ cameras. The DVR will control cameras with Pan, Tilt and Zoom capabilities. Press the **PTZ** button to display the PTZ camera menu and enter the PTZ mode, and press the button again to exit the PTZ mode.

Select the PTZ camera you wish to control by selecting it from the menu. The icon  displays on the PTZ camera screen.

To use the remote control buttons, press the **Left** and **Right** arrow buttons to pan left and right. Press the **Up** and **Down** arrow buttons to tilt the camera up and down. Press the **ZOOM +** button to zoom in, and press the **ZOOM -** button to zoom out. You can use the **FOCUS ▸** and **FOCUS ◀** buttons to focus the image.

Figure 38: PTZ Select Camera menu.

< Set Preset > < Move to Preset >

You can save camera position settings as “presets” so that you can go directly to desired views.

Once you have the camera at the desired settings, press the **PRESET SET** button, and the Set Preset dialog box will appear. Select the number you want to assign to the preset and press the **↵** button. Use the virtual keyboard to enter the preset name.

Press the **PRESET SELECT** button to load the PTZ preset and the Move to Preset dialog box will appear. Select the desired preset and press the **↵** button to load the preset.

Figure 39: PTZ Preset menu.

While in the PTZ mode, pressing the **MENU** button and selecting  (Advanced PTZ) in the menu displaying at the top of the screen displays the Advanced PTZ menu.

Set the feature you wish to control by selecting it from the menu. Refer to the camera manufacturer's instructions for the proper settings. Depending on the camera specifications, some features may not be supported.

NOTE: The Pan/Tilt speed can be controlled by using the mouse. While in the PTZ mode, clicking the left mouse button on the image and dragging the mouse in the pan/tilt direction you want to move and then select the speed.

You can use a mouse for convenient PTZ control. Click the left mouse button on the image and move that image in the direction you want to by dragging the mouse. Use the mouse wheel to zoom in and out. Position the mouse pointer at the bottom of the screen, and the following PTZ toolbar will display.

Clicking  on the left side exits the toolbar. If you want to display the toolbar again, position the mouse pointer at the bottom of the screen. Change the toolbar location by clicking the empty space on the left side of the toolbar and drag it to where you want it located on the screen. Use the arrow buttons on the toolbar to pan or tilt the camera in the direction you want. The other controls on the toolbar perform as described below:

	Zoom In / Out		Focus Near / Far
	Iris Open / Close		Set / Load Preset
	Advanced PTZ		

Event Monitoring

When an event occurs, the DVR will display the camera associated with the event and the icon  displays on screen if Event Monitoring On is selected in the Display setup screen (Main Monitor tab).

How the cameras are displayed depends on the number of cameras associated with the event. If one camera is associated with the event, the DVR will display the camera full screen. If two to four cameras are associated with the event, the DVR will display the cameras on a 2x2 screen. If five to nine cameras are associated with the event, the DVR will display the cameras on a 1+5, 1+7 or 3x3 screen. If 10 or more cameras are associated with the event, the DVR will display the cameras on a 4x4 screen.

Event monitoring lasts for the dwell time set for event recording. After the dwell time has elapsed, the monitor returns to the previous screen unless another event has occurred. If you want to return to the live monitoring mode before the dwell time has elapsed, press the **LAYOUT** button or one of the camera buttons.

Covert Camera

If a camera is set up as Covert 1 in the Camera setup screen (General tab), that camera will not be displayed unless a user with Covert Camera View authority logs into the system. However the camera title and status icons will be displayed on the monitor.

If a camera is set up as Covert 2 in the Camera setup screen (General tab), that camera appears to be Off unless a user with Covert Camera View authority logs into the system. The camera title will be grayed out and status icons will not be displayed on the monitor.

NOTE: When a camera is set up as Covert 1, the DVR displays the camera title and status icons on the covert video. When set up as Covert 2, the DVR displays only the camera title on the covert video.

If a user who has Covert Camera View authority logs into the system, the user can view video from cameras set to Covert 1 or Covert 2 including the camera titles and status icons.

Status Monitoring

Selecting (Status) in the Live Monitoring menu or Search menu displays the Event Status screen.

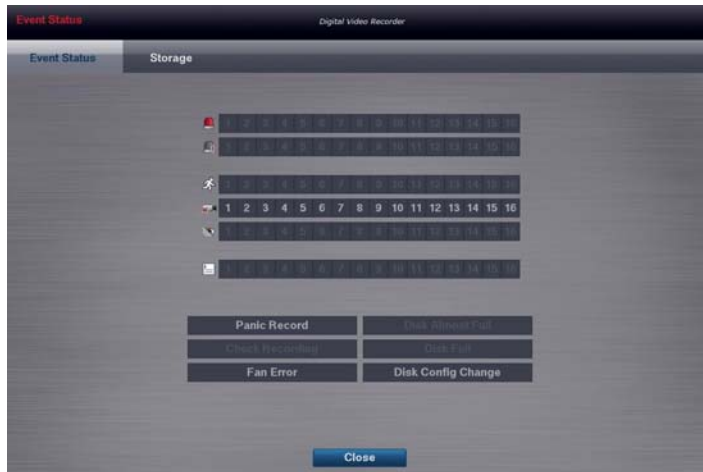

Figure 40: Event Status – Event Status screen.

The Event Status screen displays the status of the DVR's systems and inputs. Events will be highlighted, and related channels or events will flicker for five seconds when detected.

(Alarm-In), (Motion), (Video Loss), (Video Blind) and (Text-In) will be highlighted when each event is detected based on the settings you made in the Alarm-In, Motion, Video Loss, Video Blind and Text-In setup screen on the Event menu.

(Check Alarm-In) and (Check Recording) will be highlighted when each event is detected based on the settings you made in the System Event setup screen on the System menu.

(Panic Record) will be highlighted while the DVR is in the panic recording mode.

(Disk Almost Full) will be highlighted when the DVR is not in the Recycle mode and the level of disk usage reaches the Disk Almost Full percentage you made in the System Event setup screen on the System menu. (Disk Full) will be highlighted when the DVR is not in the Recycle mode and all available storage space has been used. (Disk Config Change) will be highlighted when the DVR reboots after the hard disk drive has been replaced.

(Fan Error) will be highlighted when the cooling fan to the left of the power cord on the rear panel is not working for more than four seconds.

Highlighting the **Storage** tab will display the hard disk drive status.

Type	Disk Bad	Temperature	S.M.A.R.T.	Capacity
Internal 1	Good (0%)	Good (38 °C)	Good	1.00 TB
Internal 2	Good (0%)	Good (40 °C)	Good	1.00 TB

Figure 41: Event Status – Storage screen.

The Type column displays the type of storage device.

The Disk Bad column displays the percentage of bad sectors. Not formatted indicates the device is not formatted.

The Temperature column displays the temperature of the storage device.

The S.M.A.R.T. column displays “Good”, “Bad” or “N/A”, depending on storage conditions.

- Good – The storage condition is normal.
- Bad – Data cannot be written on or read from the storage device.
- N/A – Storage conditions are normal, however, the S.M.A.R.T. monitoring is not working or supported.

NOTE: When the storage condition is “Bad”, the Event Status – Storage screen displays and you can check the storage condition for details. Once the “Bad” message displays, replacing the hard disk drive is recommended, usually within 24 hours.

Temperature and S.M.A.R.T. information will be available only for internal hard disk drives supporting the SMART (Self-Monitoring Analysis and Reporting Technology) monitoring program.

The Capacity column displays the capacity of the storage device.

Recording Video

Once you have installed the DVR following the instructions in *Chapter 2 — Installation*, it is ready to record. The DVR will start recording based on the settings you made in the Record setup screen. See *Chapter 3 — Configuration*.

Recycle On or Recycle Off. The factory default is Recycle On. It does this by recording over the oldest video once the hard disk is full. Setting the DVR to Recycle Off causes it to stop recording once the hard disk is full.

Although you will be able to record without changing the unit from its original factory settings, you will want to take advantages of the DVR’s many tools. See *Chapter 3 — Configuration* for detailed descriptions of the recording mode options.

Panic Recording

Selecting  (Panic) in the Live Monitoring menu or pressing the  button starts panic recording of all cameras, and selecting  or pressing the button again stops panic recording. If you set the Panic Recording Duration in the Panic Record setup screen, panic recording will stop automatically according to the preset duration as long as  is not selected or the  button is not pressed.

NOTE: When the DVR is not in the Recycle mode and all available storage space has been used, panic recording will not operate.

Recording Audio

If the DVR was set up to record audio, it will record audio from up to four inputs when video is recording.

NOTE: Make certain you comply with all local and federal laws and regulations when recording audio.

Playing Recorded Video

If a user who has Search authority logs into the system, the user can view recorded image. Once video has been recorded, you can view it by pressing the any playback button on the remote control.

When playing video for the first time, the DVR will display the most recent image. When playing video subsequent times, the DVR will start playing video from the last recalled image. Recorded audio will be played when the DVR displays a camera with recorded audio in full screen mode.

NOTE: Only the administrator and users with *Covert Camera View* authority can view video from covert cameras. The covert cameras in the playback mode are determined by the current camera settings.

Playback Related Buttons on the Remote Control

- **Camera Buttons:** Pressing the individual camera buttons will cause the selected camera to display full screen. When selecting 11 to 16, press +10 and then press the 1 to 6.
- **Playback Buttons**
 - Backward:** When in the pause mode, pressing the  button moves to the previous image.
 - Forward:** When in the pause mode, pressing the  button moves to the next image.
 - Rewind:** Pressing the  button plays video backward at high speed. Pressing the button again toggles the playback speed from ,  and .
 - Play/Pause:** Pressing the  button plays back video at regular speed. The screen displays  when the DVR is in the Pause mode and the screen displays  when the DVR is playing back video.
 - Fast Forward:** Pressing the  button plays video forward at high speed. Pressing the button again toggles the playback speed from ,  and .
 - Stop:** Pressing the  button stops playback and enters the Live Monitoring mode.
- **ZOOM Button:** Pressing the ZOOM button and selecting the camera button on the remote control zooms the current playback image of the selected camera.
- **LAYOUT Button:** Pressing the button toggles between different display formats. The available formats are: 4x4, 3x3, 2x2 and PIP.

You can use a mouse for convenient playback control. Position the mouse pointer on the playback screen, and the following Record Table Search (Compact View Mode) screen will display. The individual controls on the toolbar perform the following functions as described below:

Searching Video

While in the search mode, pressing the **MENU** button displays the following Search menu on the right edge of the screen. Pressing the **MENU** button again hides the menu. You can navigate through menus and items by pressing the arrow buttons.

Figure 42: Search menu.

NOTE: The Search menu also can be displayed by moving the mouse pointer on the right edge of the screen.

Search Menu

Search

- **Event Log Search:** Selecting  (Search) → Event Log Search selects video from the event log. See the following *Event Log Search* section for details.
- **Record Table Search:** Selecting  (Search) → Record Table Search selects using a recording table. See the following *Record Table Search* section for details.
- **Motion Search:** Selecting  (Search) → Motion Search selects motion events. See the following *Motion Search* section for details.
- **Text-In Search:** Selecting  (Search) → Text-In Search selects text input strings. See the following *Text-In Search* section for details.

Go To

- **Go to the First:** Selecting  (Go To) → Go to the First displays the first recorded image.
- **Go to the Last:** Selecting  (Go To) → Go to the Last displays the last recorded image.
- **Go to the Date/Time:** Selecting  (Go To) → Go to the Date/Time displays the Go to the Date/Time screen.

Move the cursor over the date and time and press the button. You can use the Left and Right arrow buttons to highlight the year, month, day, hours, minutes and seconds. Use the Up and Down arrow buttons to change to the date and time you want to search for video.

Once you have set the date and time you want, press the button. Then highlight **Go** and press the button. The selected date and time will display. (If no video was recorded during the selected time, a message appears alerting you that no image was recorded at that time.) The button and arrow buttons can now be used to review the surrounding video.

Bookmark

Selecting (Bookmark) in the Search menu adds the current playback point to the bookmark list. See the following *Bookmarks* section for details.

Display

- **Full Screen:** Selecting (Display) → (Full Screen) and choosing the camera number button displays the selected camera full screen. It is the same as pressing the individual camera buttons on the remote control or clicking the left mouse button on a camera image when in one of the multiview formats (i.e., 2x2, 1+5, 1+7, 3x3 or 4x4). Clicking the left mouse button on the screen again returns to the previous display mode.
- **2x2, 1+5, 1+7, 3x3, 4x4:** Selecting (Display) → , , , or (2x2, 1+5, 1+7, 3x3 or 4x4) displays the cameras in the selected multiview screen mode (2x2, 1+5, 1+7, 3x3 or 4x4). Selecting each display mode is the same as pressing the **LAYOUT** button or scrolling the mouse wheel up and down when in one of the multiview formats (i.e., 2x2, 1+5, 1+7, 3x3 or 4x4).
- **Camera OSD, Status OSD:** Selecting (Display) → Camera OSD or Status OSD toggles Camera OSD or Status OSD On and Off.

Previous Group, Next Group

Selecting or (Previous Group or Next Group) in the Search menu moves to the previous or next page. It is the same as pressing the Left or Right buttons on the remote control.

Alarm

Selecting (Alarm) in the Search menu resets the DVR's outputs including the internal buzzer during an alarm. It is the same as pressing the **ALARM** button.

Panic

Selecting (Panic) in the Search menu starts panic recording of all cameras, and selecting again stops panic recording. It is the same as pressing the **PANIC** button.

Camera Menu

- **Zoom:** Selecting (Camera Menu) → **Zoom** and choosing the camera number zooms the current playback image of the selected camera on the screen. It is the same as pressing the **ZOOM** button. Selecting **Zoom** again exits the Zoom mode.
- **Audio:** Selecting (Camera Menu) → **Audio** toggles audio playback On and Off. Recorded audio will be played when the DVR displays a camera with recorded audio in full screen mode.
- **Show/Hide Text-In:** Selecting (Camera Menu) → **Show Text-In** or **Hide Text-In** shows or hides the text-in data on the screen if the video was recorded with text-in data.
- **Edit Group:** Selecting (Camera Menu) → **Edit Group** enters to the Active Cameo mode. It is the same as pressing the button in any multiview formats. Refer to the previous *Live Monitoring – Active Cameo Mode* section for details.

NOTE: The *Camera Menu* also can be displayed by clicking the right mouse button on the screen while in the search mode.

Export

- **A–B Backup:** Selecting  (Export) → A–B Backup will set the starting point of the video to be clip copied, and the  icon displays at the bottom-left corner of the screen. Selecting A–B Backup again will set the ending point of the video to be clip copied and displays the Backup screen. See the following *Backup* section for details.
- **Backup:** Select  (Export) → Backup, and the Backup screen appears to allow backup setup. See the following *Backup* section for details.

Status

Selecting  (Status) in the Search menu allows you to check the status of the DVR's system, inputs and storage. Refer to the previous *Live Monitoring – Status Monitoring* section for details.

NOTE: Selecting *Status* will only be enabled for a user who has *System Check* authority.

Data Source

Selecting  (Data Source) in the Search menu allows you to select the data source to be searched. Selecting Record searches recorded data on primary storage installed in the DVR, and selecting Other searches recorded data on storage used for another DVR then installed in this DVR.

Exit

Selecting  (Exit) in the Search menu exits the search mode and enters the live monitoring mode.

Event Log Search

The screenshot shows the 'Event Log Search' interface with a table of events. The table has three columns: Time, Type, and Title. The events listed are 'Video Loss' for cameras CAM3 through CAM16, and a 'Panic On' event. The interface includes an 'Option...' button and a 'Close' button at the bottom.

Time	Type	Title
2013/06/27 01:51:40	Video Loss 16	CAM16
2013/06/27 01:51:40	Video Loss 15	CAM15
2013/06/27 01:51:40	Video Loss 14	CAM14
2013/06/27 01:51:40	Video Loss 13	CAM13
2013/06/27 01:51:40	Video Loss 12	CAM12
2013/06/27 01:51:40	Video Loss 11	CAM11
2013/06/27 01:51:40	Video Loss 10	CAM10
2013/06/27 01:51:40	Video Loss 9	CAM9
2013/06/27 01:51:40	Video Loss 8	CAM8
2013/06/27 01:51:40	Video Loss 7	CAM7
2013/06/27 01:51:40	Video Loss 6	CAM6
2013/06/27 01:51:40	Video Loss 5	CAM5
2013/06/27 01:51:40	Video Loss 4	CAM4
2013/06/27 01:51:40	Video Loss 3	CAM3
2013/06/27 01:51:40	Panic On	

Figure 43: Event Log Search screen.

The DVR maintains a log of each time the Alarm Input port is activated. The Event Log Search screen displays this list. Use the arrow buttons to highlight the event for which you would like to see video.

There is no determined user authority to display the Event Log Search screen, however, the event video will not be played unless a user with Search authority logs into the system.

Pressing the  button will extract the event video and display the first image of the event. Pressing the  button will start playing the “event” video segment. Pressing any playback button on the remote control returns to live monitoring.

NOTE: It is possible that no recorded image displays on the current screen. Press the **LAYOUT** button and change the screen mode to 4x4. You will be able to easily see the camera have recorded video during target time.

You can also narrow your event search by selecting the Option... button and setting up the new search condition.

You can search video from the first to last recorded images, or you can set the start and stop times and dates.

Highlight the box beside **From** and press the  button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the first recorded image. When highlighting  and pressing the  button the bookmark list displays and the bookmark point you selected will be the starting date and time.

Highlight the box beside **To** and press the  button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the last recorded image. When highlighting  and pressing the  button the bookmark list displays and the bookmark point you selected will be the ending date and time.

Highlight the box beside **Check Time Overlap** and press the  button. It toggles between On and Off. You will only be able to turn the Check Time Overlap on or off if a user-defined date and time is set to From and To. If the DVR's date and time have been reset, it is possible for the DVR to have more than one overlapping start and stop time. When set to On, you will be asked to select one of the overlapping start and stop time. When set to Off, the DVR will display search results from all start times to all stop times.

Highlight the box beside **Alarm-In** and press the  button. You can select the alarm inputs that you want to include in your search.

Highlight the box beside **Motion** and press the  button. You can select the cameras for which you want any reports of motion.

Highlight the box beside **Video Loss** and press the  button. You can select the cameras for which you want any reports of lost video.

Highlight the box beside **Video Blind** and press the  button. You can select the cameras for which you want any reports of blind video.

Highlight the box beside **Text-In** and press the  button. You can select the text-in devices which you want any reports of text input.

Highlight the box beside **Record Channels** and press the  button. You can select the cameras that you want to search for any reports of event recorded data. The DVR will display the events (not the camera channels) that occurred and that also are recorded on the camera channel that you selected. If you do not select a camera channel in this field, the DVR will search events that are not associated with cameras.

You can also toggle On and Off self-diagnostic System Events as part of your search. The choices are:

- Panic Record
- Check Recording
- Check Alarm-In
- Disk Almost Full
- Disk Bad
- Disk Temperature
- Disk S.M.A.R.T.
- Fan Error
- Disk Config Change

Once you set your desired search conditions, highlight Search and press the  button to display the search results in the Event Log Search screen. Selecting Cancel exits the screen without saving the changes.

Record Table Search

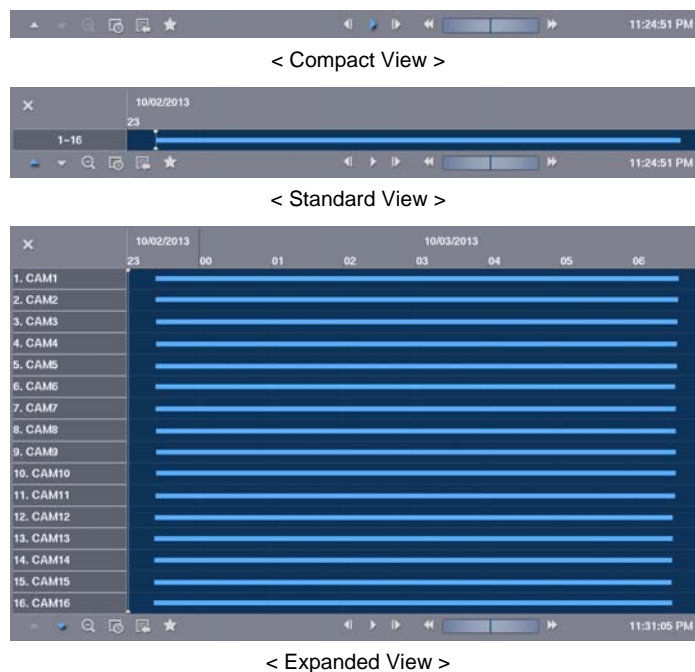

Figure 44: Record Table Search screen.

Recording information about video images currently displayed on the screen displays on the recording status bar. A grey vertical line indicates the current search position. To search specific video, move the vertical line by using the Left or Right arrow buttons on the remote control or by clicking the mouse on the desired segment.

If the DVR's time and date have been reset to a time that is earlier than some recorded video, it is possible for the DVR to have more than one video stream in the same time range. In this case, the overlapping time range in the record table will be separated by a yellow vertical line.

NOTE: The recorded data in the time range located after the yellow vertical line is the latest.

There are three view modes. Standard view, Expanded view and Compact view. Standard view (default) displays combined recording information of all camera channels currently displayed on the screen. In the Standard view mode, selecting the ▲ icon located at the bottom switches to the Expanded view mode. The Expanded view displays the recording information of each camera channel currently displayed on the screen. Selecting the ▼ icon in the Standard view mode switches to the Compact view mode which displays only the toolbar. Selecting the ▲ icon in the Compact view mode switches to the Standard view mode, and selecting the ▼ icon in the Expanded view mode switches to the Standard view mode.

Selecting 🔍 or 🔍 located at the bottom zooms the record table. Selecting 🔍 displays eight hours (12 hours with 1920x1080 resolution) (1-minute based), and selecting 🔍 displays 24 hours (3-minute based) at once. To move to earlier or later times that are not shown in the current record table screen, select the arrows located at the end of the times by using the arrow buttons on the remote control.

NOTE: If the DVR has images recorded in more than one recording mode in the same time range, the recording status bar displays recording information in the following priority order: Panic → Pre-Event → Event → Time. The color of the bar indicates different recording modes: Red for Panic, Yellow for Pre-Event, Purple for Event, and Blue for Time.

Selecting 📅 located at the bottom displays the Calendar Search screen.

Days with recorded video display on the calendar with white numbers. You can highlight the days with recorded video by using the arrow buttons. Once you have highlighted a day, press the ⏪ button to select it. The first recorded image of the selected date will pause on the screen. Once you have selected the date you want to search, review the surrounding video by using the playback controls located at the bottom of the Record Table Search screen.

Selecting 📄 located at the bottom displays the Search menu.

- **Go To:** Displays the first or last recorded image, or searches by date and time (see the previous *Searching Video – Go To* section of this chapter for more details).
- **Backup:** Clips a video segment and saves it (see the following *Backup* section for more details).
- **Zoom:** Zooms the current playback image.
- **Slow Play:** Plays video at low speed (x1/2, x1/3, x1/4, x1/6 and x1/8).

The individual playback controls at the bottom perform the following functions as described below:

- ⏪ Go to the previous image
- ▶ Play/Pause
- ⏩ Go to the next image
- ⏮ Fast backward play
- ⏭ Fast forward play

Selecting ★ located at the bottom displays the Bookmarks screen. See the following Bookmarks section for details.

Selecting ✕ in the top-left corner exits the Record Table Search screen.

Motion Search

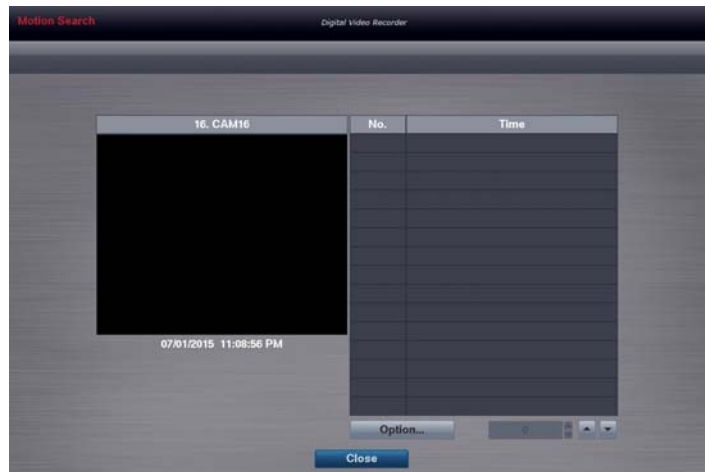

Figure 45: Motion Search screen.

The Motion Search... can be selected from the Search menu while the DVR displays the camera full screen. The Motion Search screen displays a list of motion events. Use the arrow buttons to highlight the event for which you would like to see video and press the button to display the video associated with the selected event on the small search screen.

Highlighting Close and pressing the button will extract the video associated with the Motion event and display the first image of the event. Pressing the button will start playing the “event” video segment. Pressing any playback button on the remote control returns to live monitoring.

You can also narrow your event search by selecting the Option... button and setting up the new search condition.

You can search video from the first to last recorded images, or you can set the start and stop times and dates.

Highlight the box beside From and press the button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the first recorded image. When highlighting and pressing the button the bookmark list displays and the bookmark point you selected will be the starting date and time.

Highlight the box beside To and press the button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the last recorded image. When highlighting and pressing the button the bookmark list displays and the bookmark point you selected will be the ending date and time.

Highlight the box beside Type and press the button. You can select between Motion Search and Museum Search. Motion Search detects motion in the defined area. Museum Search detects if a defined object has moved.

Highlight the box beside Zone and press the button. An image from the video appears with a grid overlaid. You can turn sensor blocks On and Off to define the area of the picture in which you want to search for motion.

NOTE: Defining the area of the image in which you want to search for motion is nearly identical to setting up the DVR for Motion. Please refer to *Motion Screen* in *Chapter 3 — Configuration* for more detailed instructions on setting up the detection blocks.

When setting the Museum Search Zone, the zone should be placed inside of the border line of the target object. If the selected block is placed on the border line, the sensitivity of the Museum Search may decrease.

The zone should be placed or focused on the centre or, at least, within the outline of targeted object.

Highlight the box beside **Sensitivity** and press the  button. You will be able to select from 1 (low sensitivity) to 5 (high sensitivity).

Highlight the box beside **Min. Blocks** and press the  button. You will be able to set the number of sensor blocks that must be activated.

Once you set your desired search conditions, highlight **Search** and press the  button to display the search results in the Motion Search screen. Selecting **Cancel** exits the screen without saving the changes.

When you search for motion events of another camera, you will be asked whether or not you want to delete the previous search results from the list.

Text-In Search

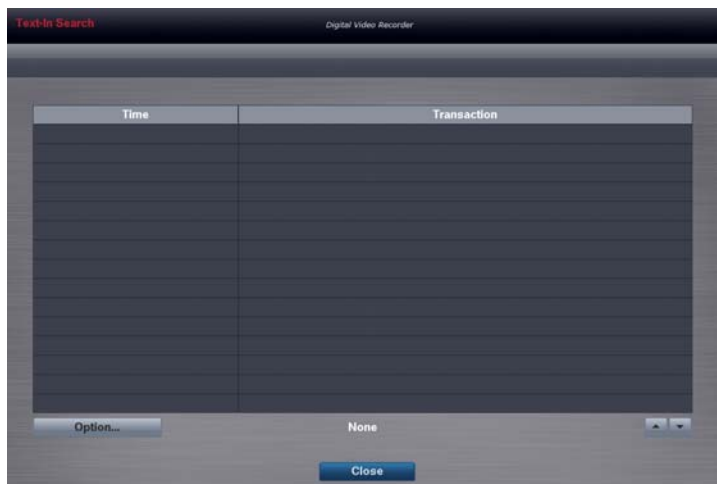

Figure 46: Text-In Search screen.

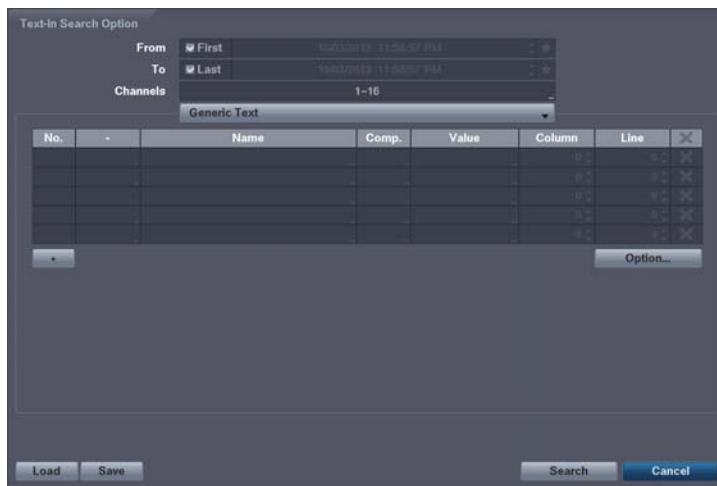

The DVR maintains a log of each time there is Text Input. The Text-In Search screen displays this list. Use the arrow buttons to highlight the event for which you would like to see video.

Pressing the  button will extract the video associated with the Text Input and display the first image of the event. Pressing the  button will start playing the “event” video segment. Pressing any playback button on the remote control returns to live monitoring.

NOTE: It is possible that no recorded image displays on the current screen. Press the **DISPLAY** button and change the screen mode to 4x4. You will be able to easily see the camera have recorded video during target time.

Text Input information will be overlaid on the image while the recorded video is played at regular speed.

You can also narrow your event search by selecting the **Option...** button and setting up the new search condition.

You can search video from the first to last recorded images, or you can set the start and stop times and dates.

Highlight the box beside **From** and press the button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the first recorded image. When highlighting and pressing the button the bookmark list displays and the bookmark point you selected will be the starting date and time.

Highlight the box beside **To** and press the button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the last recorded image. When highlighting and pressing the button the bookmark list displays and the bookmark point you selected will be the ending date and time.

Highlight the **Channel** and press the button. Select the text-in devices that you want to search for text input.

Highlight the **Text Input Device** box and press the button. Select your Text Input Device from the list.

Highlighting the **+** and pressing the button allows you to add a new set of search parameter. Set up the desired search parameter. Refer to the *Appendix – Text-In Search Examples* for further information on setting up search parameters. The **X** column can be used to delete a set of search parameter or entire sets of search parameters.

Highlighting the **Option...** box and pressing the button allows you to select whether or not the search will find only text strings in which the case matches, find only exact words that match with the word you entered during text-in setup, or delete transactions duplicated within text input strings.

Highlight **Load** and press the button to load saved search option settings. Select the desired search option settings.

Highlight **Save** and press the button to save the current search option settings. A virtual keyboard appears that you can use to enter the search option name.

Once you set your desired search conditions, highlight **Search** and press the button to display the search results in the **Text-In Search** screen. Selecting **Cancel** exits the screen without saving the changes.

Bookmarks

The Bookmarks screen can also be accessed by selecting **Bookmark** in the Search – Go To menu.

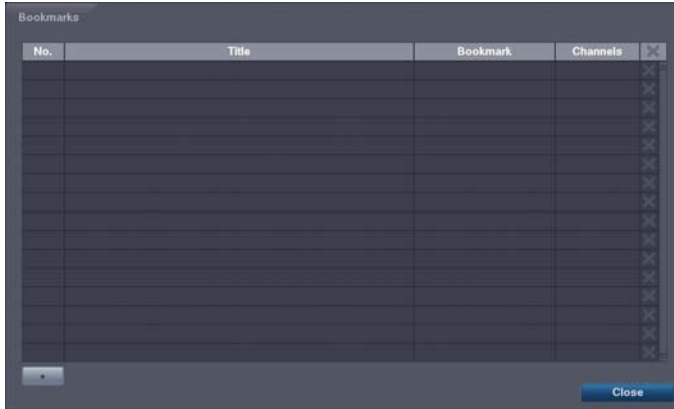

Figure 47: Bookmarks screen.

Highlight **+** and press the **⏏** button to add the current playback point to the bookmark list. Highlight the **Title** box and enter the name of the registered bookmark. Use the virtual keyboard to enter the bookmark name. The **X** column can be used to delete a Bookmark.

NOTE: Up to 64 bookmarks can be registered.

Use the arrow buttons to highlight the bookmark point for which you would like to see video. The selected bookmark will display on the screen by pressing the **⏏** button.

Backup

Video clips can be copied on a USB flash drive. The copied video clips can be viewed on computers running Microsoft Windows 2000, XP, Vista or 7.

Selecting **A–B Backup** in the Search – Export menu or pressing the **BACK UP** button on the remote control during playback will set the starting point of the video to be clip copied, and the **⏏** icon displays at the bottom-left corner of the screen. Selecting **A–B Backup** in the Search – Export menu or pressing the **BACK UP** button again will set the ending point of the video to be clip copied by displaying the Backup screen.

Select **Backup** in the Search – Export menu, press the **BACK UP** button while in the Live Monitoring mode, and the Backup screen appears to allow backup setup.

Figure 48: Backup screen.

You can search video from the first to last recorded images, or you can set the start and stop times and dates.

Highlight the box beside **From** and press the  button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the first recorded image. When highlighting  and pressing the  button the bookmark list displays and the bookmark point you selected will be the starting date and time.

Highlight the box beside **To** and press the  button to toggle between On and Off. When set to Off, you can enter a specific Date and Time. When set to On, the search will be from the last recorded image. When highlighting  and pressing the  button the bookmark list displays and the bookmark point you selected will be the ending date and time.

Highlight the box beside **Channels** and press the  button. You can select the cameras that you would like to include in your video clip.

Highlight the box beside **Password** and press the  button. A virtual keyboard appears allowing you to enter the password for reviewing the video clips.

Highlight the box beside **Dest.** and press the  button. You can select the storage device on which you would like to record the video clip.

CAUTION: The USB device for backup must be FAT 16 or FAT32 format.

The DVR automatically assigns a file name to the video clip. However, you can give the video clip file a different name. Highlight the box beside **File Name** and press the  button. A virtual keyboard appears. Enter a file name for the video you are backing up and select **Close**. The DVR will automatically add the camera number (for example “01”) and “.exe” to the file name.

NOTE: When naming a file, you cannot use the following characters: \, /, :, *, ?, “, <, >, |.

Highlight **Include Text-In Data** and press the  button. This will toggle between On and Off. When this feature is On, you can include text-in data when copying video if the video was recorded with text-in data.

Once you have given the video clip a file name, highlight the **Start** button and press the  button. The confirmation screen displaying data size will appear. When the storage device does not have enough space, the DVR will ask if you want to copy as much of the video clip as possible in the available space. Highlight the **Continue** button and press the  button to continue backup.

Once the backup starts, you can cancel it by selecting **Cancel** or hide the screen by selecting **Close**. When selecting **Close**, the backup continues and a confirmation screen will display when complete.

NOTE: The file size for backup is limited to 30GB. When copying video clips larger than 2GB, the video clips will be save in units of 2GB. For example, 3 individual 2GB files will be created when saving a 6GB video clip.

You can use other functions on the DVR while video is being backed up. To do this, highlight the **Close** button and press the  button. You can return to the **Backup** screen at any time to check the progress.

You do not need to install any special software on your personal computer to review the video clips. Refer to REVO Remote Pro manual for instructions on how to review video clips you have copied.

NOTE: During Backup, you cannot shut the system down, clear data on the storage device, or format the storage device.

CAUTION: Do NOT disconnect the USB flash drive from the DVR while backing up video.

Appendix

Text-In Search Examples

Search Example I

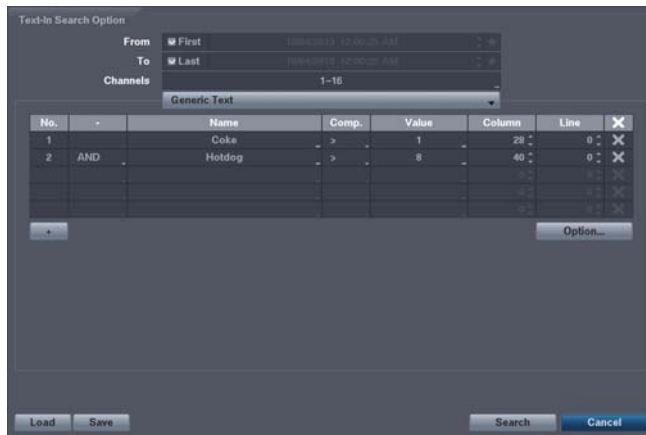

1 2 3 4 5 6
 123456789012345678901234567890123456789012345678901234567890

Item	Unit price	Qty	amount
Coke	\$ 2.20	1(s)	\$ 2.20
Fanta	\$ 2.20	1(s)	\$ 2.20
Hotdog	\$ 3.50	3(s)	\$ 10.50
Pepsi	\$ 1.95	1(s)	\$ 1.95
total : \$			16.85

Thank you~~

In the above text-in data, you can find that the comparison value is located at 17th (Unit price, \$ mark will be ignored automatically), 28th (Qty) and 40th (amount) characters (including spaces) from the left. In this case, you can enter "17", "28" and "40" in each Column box.

For example, if you want to search for Coke with a Qty (Quantity) of more than 1 and Hotdog with an amount totaling over \$8, the following search condition can be set.

Search Example II

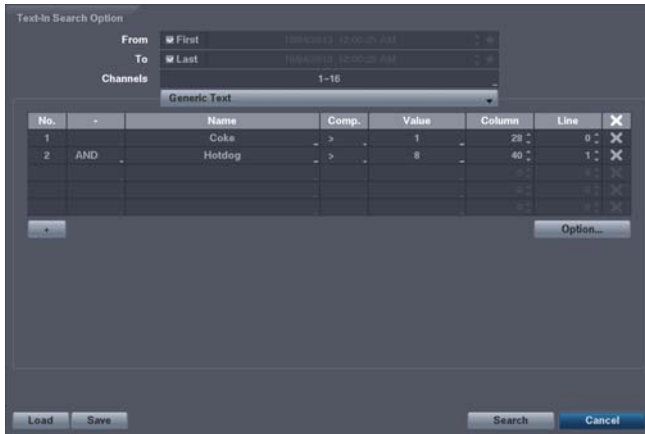

1 2 3 4 5 6
 123456789012345678901234567890123456789012345678901234567890

Item	Unit price	Qty	amount
Coke	\$ 2.20	1(s)	\$ 2.20
Fanta	\$ 2.20	1(s)	\$ 2.20
Hotdog	\$ 3.50	3(s)	\$ 10.50
Pepsi	\$ 1.95	1(s)	\$ 1.95
total :			\$ 16.85

Thank you~~

In the above text-in data, you can find that the comparison value is located at 17th (Unit price, \$ mark will be ignored automatically), 28th (Qty) and 40th (amount) characters (including spaces) from the left, but the value of amount category is located on a different line from Item. In this case, you can enter “17”, “28” and “40” in each Column box and enter “1” in the Line box for the next line.

For example, if you want to search for Coke with a Qty (Quantity) of more than 1 and Hotdog with an amount totaling over \$8, the following search condition can be set.

REVO Remote

REVO Remote allows you to access a remote DVR, monitor live video images and search recorded video using Internet Explorer web browser anytime from virtually anywhere.

Computer system requirements for using the REVO Remote program are:

- Operating System: Microsoft® Windows® XP (Service Pack 3), Microsoft® Windows® Vista (Service Pack 1), Microsoft® Windows® 7 (Home Premium, Professional, Ultimate) or Microsoft® Windows® 8 (Pro, Enterprise)
- CPU: Intel Pentium III (Celeron) 600MHz or faster
- RAM: 128MB or higher
- VGA: 8MB or higher (1024x768, 24bpp or higher)
- Internet Explorer: Version 6.0 or later (32-Bit)

Start Internet Explorer on your local PC. You can run the REVO Remote program by entering the following information in the address field.

- “http://IP address:port number” (The DVR IP address and the REVO Remote port number (default: 12088) set in the Network setup screen (REVO Remote tab))
- Or, “http://www.revodvr.com/DVR name” (The DVR name registered on the DVRNS server)

NOTE: You will need to get the appropriate IP address for the DVR you want to connect to and the REVO Remote port number from your network administrator.

REVO Remote only works with Microsoft Internet Explorer and will NOT work with other browsers.

REVO Remote does not work in Microsoft® Windows® 8 metro UI.

Select between the REMOTE WATCH (Web monitoring) and REMOTE SEARCH (Web search) modes. Entering ID (default: admin) and PASSWORD, and clicking the [LOGIN] button logs in using the selected mode.

You will need to enter the DVR IP address in the DVR ADDRESS field when running the REVO Remote program by entering http://www.revodvr.com. Selecting the Use DVRNS option allows you to enter the DVR name registered on the DVRNS server instead of the IP address. You must enter the DVRNS server address and port number in the SETUP setting when selecting the Use DVRNS option.

NOTE: Do NOT close the LOGIN window during the REVO Remote operation, otherwise, it will cause a script error when switching between Web monitoring and Web search modes, and you will need to restart the REVO Remote program.

When running the updated REVO Remote for the first time, Internet Explorer might occasionally load the information of the previous version. In this case, delete the temporary internet files by selecting Tools → Internet Options → General tab, and then run REVO Remote again.

There might be a problem that the bottom of REVO Remote page is cropped due to the address or status bars. In this situation, it is recommended that websites open windows without address or status bars by changing the internet setting. (Go to the Tools → Internet Options → Security tab → Click the Custom level... button → Select *Enable* for the *Allow websites to open windows without address or status bars* option)

When running REVO Remote in the Microsoft Windows Vista or higher operating system, it is recommended to start Internet Explorer with elevated administrator permissions. Click the right mouse button on the Internet Explorer icon and select the *Run as administrator* option from the context menu. Otherwise, some functions of the REVO Remote might be limited to use.

NOTE: There might be a problem with screen display or screen update due to low image transmission speed when using the Microsoft Windows Vista or higher operating system. In this situation, it is recommended that you disable the Auto Tuning capability of your computer.

Run the *Command Prompt* with elevated administrator permissions (Go to the Start Menu → Accessories → Command Prompt → Click the right mouse button and select the *Run as administrator* option). Then enter “netsh int tcp set global autotuninglevel=disable” and hit the enter key. Restart your computer to apply the changes.

If you want to enable the Auto Tuning capability again, enter “netsh int tcp set global autotuninglevel=normal” after running the Command Prompt with elevated administrator permissions. Restart your computer to apply the changes.

Web Monitoring Mode

Remote Watch is a remote web monitoring program that allows you to monitor live video transmitted in real-time from the remote DVR.

- ① Click the to log out the REVO Remote program.
- ② Click the to access to the web search mode.
- ③ Position the mouse pointer on the Remote Watch logo to see the version of the REVO Remote program.
- ④ The DVR information window displays the login information of REVO Remote.
- ⑤ Click the screen format to select the desired display mode. When changing the screen format, the selected camera on the current screen will be located in the first cell of the new layout.
- ⑥ Click the camera button to select the camera to be viewed.
- ⑦ Click the to adjust the brightness, contrast, saturation and hue of monitoring image.
- ⑧ Click the to control pan, tilt and zoom of the camera from a remote site.
- ⑨ Click the to control alarm out devices at the remote site.

- ⑩ Click the  to save the current image as a bitmap or JPEG file format.
- ⑪ Click the  to set up the image drawing mode, OSD display and beep on/off. You can adjust the display speed by changing the image drawing mode, select OSD information to be displayed on the screen, and turn the DVR's internal buzzer on and off from a remote site.
- ⑫ The event status window at the bottom displays a list of events that were detected from the remote site.
- ⑬ Selecting a camera on the screen and clicking the right mouse button displays the text menu screen.

- **Change Camera Title:** Changes the camera name.
- **Enable Audio:** Enables audio communication with the remote site. When the audio control panel displays, click the  to send audio to the connected remote site and click the button again to stop sending audio. Click the  to monitor live audio from the connected remote site through the attached speaker and click the button again stop monitoring live audio. Clicking both  and  allows two-way communication. Clicking the  disables audio communication.
- **Aspect Ratio:** Changes the image aspect ratio.
- **Anti-Aliasing Screen:** Enhances image display quality by eliminating stair stepping (aliasing) effects in the enlarged image.

NOTE: A camera name change in the Web Watch mode does not affect the camera name set up on the remote site. Leaving the Camera Title blank causes the camera name set up on the remote site to display. The  icon will display on each camera screen when audio communication is available between the REVO Remote system and a DVR.

Web Search Mode

Remote Search is a remote web search program that allows you to search recorded video on the remote DVR.

NOTE: The remote site connection in the Web Search mode will automatically be disconnected if there is no activity for 30 minutes.

- ① Click the  to log out the REVO Remote program.
- ② Click the  to access to the web monitoring mode.
- ③ Position the mouse pointer on the Remote Search logo to see the version of the REVO Remote program.

- ④ The DVR information window displays the time information of recorded data on the remote DVR and login information of REVO Remote.
- ⑤ Click the to blur, sharpen, equalize and interpolate playback images. Click the to zoom out or zoom in the recorded image. Click the to adjust the brightness of the recorded images.

NOTE: Image processing works only in the pause mode.

- ⑥ The playback function buttons include fast backward, pause, play, fast forward, go to the first image, go to the previous image, go to the next image, and go to the last image.
- ⑦ Click the screen format to select the desired display mode.

- ⑧ Click the to enter the time-lapse search mode which allows you to search for recorded data by time and then play back images found within the time parameters. The Timetable window located at the bottom displays the time information for the image of the date selected on the calendar. If more than one video stream in the same time range, you can select the video stream you want to search. Clicking a specific time displays the image recorded at that time on the screen. Selecting the allows you to display an image from a specific time.

- ⑨ Click the to enter the event search mode which allows you to search for event log entries using specific conditions and play back the images associated with those event entries.
- ⑩ Click the to save any video clip of recorded data as an executable file, or click the to save the current image in a bitmap or JPEG file format. Click the to print the current image on a printer connected to your computer.

NOTE: When saving as an executable file, selecting the *Exclude Player* option will reduce the file size and its saving time. You can download the Player program to review the video clip by entering the following information in the address field of Internet Explorer.

- When using the EZLink: "http://DVRNS server address/DVR Name/ClipPlayer.exe" (The DVRNS server address and the DVR name registered on the DVRNS server)
- When not using the EZLink: "http://IP address:port number/ClipPlayer.exe" (The DVR IP address and the REVO Remote port number (default: 12088) set in the Network setup screen (REVO Remote tab))

- ⑪ Click the to set up the image drawing mode and OSD display. You can adjust the display speed by changing the image drawing mode, and select OSD information to be displayed on the screen.
- ⑫ Click the to reload the recording data.
- ⑬ The Timetable displays recorded data of the selected camera by time (in hour segments).
- ⑭ Selecting a camera on the screen and clicking the right mouse button displays the text menu screen.

- Change Camera Title: Changes the camera name.
- Enable Audio: Plays audio while playing back recorded video that has recorded audio. (Single-Screen Layout Only)
- Aspect Ratio: Changes the image aspect ratio.
- Anti-Aliasing Screen: Enhances image display quality by eliminating stair stepping (aliasing) effects in the enlarged image.

NOTE: A camera name change in the Web Search mode does not affect the camera name set up on the remote site. Leaving the Camera Title blank causes the camera name set up on the remote site to display.

Time Overlap

If the DVR's time and date have been reset to a time that is earlier than the existing recorded video, it is possible for the DVR to have more than one video stream in the same time range. In this case, you can search overlapping video streams individually by selecting a specific segment. For example, when the DVR has recorded video from one to five o'clock and the user changes the time backward from five to three o'clock and then continues recording until six o'clock, there will be two video streams and segments from three to five o'clock.

You can search overlapping video streams by selecting a specific time or time range. If you want to search recorded video at four o'clock during the overlapping time range using a search menu such as **Go to the Date/Time**, select the segment you want to search.

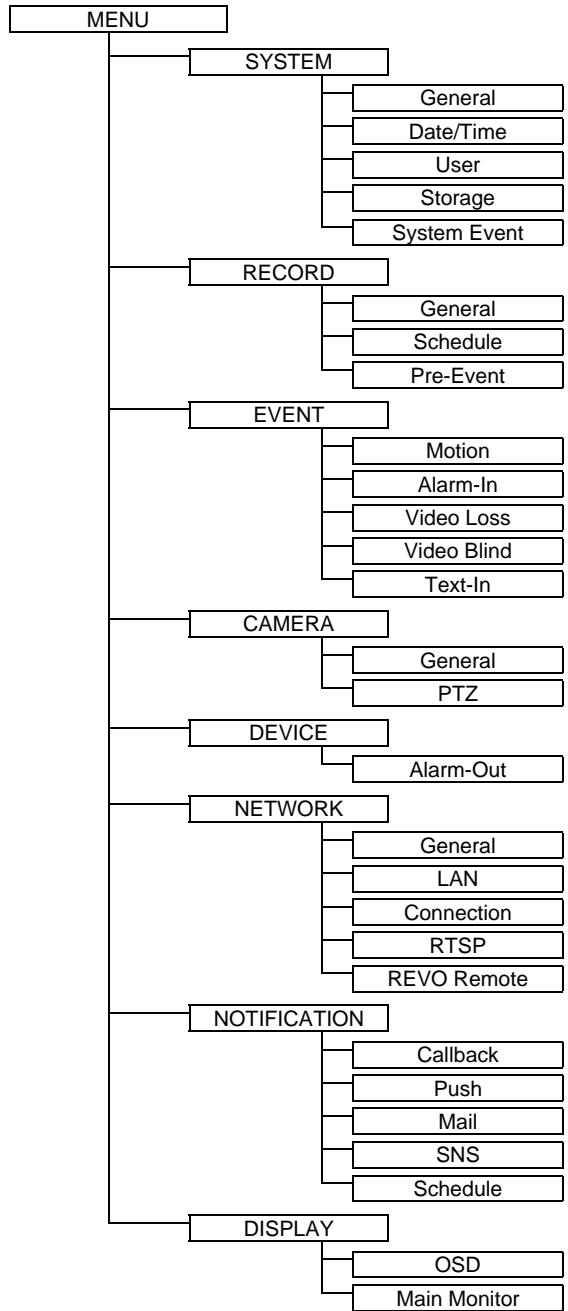

If you want to search recorded video from four to five o'clock during the overlapping time range using a search menu such as **Event Log Search**, **Text-In Search** or **Motion Search**, it is possible for the DVR to have two overlapping start and stop times. You will be asked to select one of the overlapping start and stop times from the search time ranges as follows:

- From four o'clock of the first segment to five o'clock of the first segment
- From four o'clock of the first segment to five o'clock of the second segment
- From four o'clock of the second segment to five o'clock of the second segment

Troubleshooting

Problem	Possible Solution
No Power	<ul style="list-style-type: none"> • Check power cord connections. • Confirm that there is power at the outlet.
No Live Video	<ul style="list-style-type: none"> • Check camera video cable and connections. • Check monitor video cable and connections. • Confirm that the camera has power. • Check camera lens settings. • Check the current main monitor resolution.
DVR has stopped recording	If hard disk drive is full, you will either need to delete video or set the DVR to the Overwrite Mode.
The icon  displays, however, the DVR is not recording.	When the DVR is in the Pre-Event recording mode, the yellow  and  display when there is no event, and the DVR is not recording. The red  and  display when any event occurs and the DVR starts recording.
While upgrading the system, the DVR keeps rebooting and the upgrade fails.	If the current system version is higher than the upgrade package file version, you should reset the DVR first using the Factory Reset. When using the Factory Reset, you will lose any settings you have saved.

Specifications

VIDEO	
Signal Format	NTSC
Video Input	12 RJ-12 and 4 BNC inputs, 1 Vp-p, auto-terminating, 75 Ohms
Monitor Outputs	HDMI: 1 HDMI VGA: 1
Video Resolution	HDMI: 1920x1080, 1440x900, 1280x1024 VGA: 1920x1080, 1440x900, 1280x1024
Record Speed (images per second)	480ips (NTSC), 400ips (PAL) @ D1 (Real-time)
Playback Speed (images per second)	480ips (NTSC), 400ips (PAL) @ CIF (Full Duplex)

INPUTS/OUTPUTS	
Alarm Input	16 terminal, programmable as NC or NO, 2.4V (NC) or 0.3V (NO) threshold, 5VDC
